To clarify, do we give you our address and what we want and you order it for us? I'm guessing not but it's worth a shot, can you do Drizly? Also I know this is a silly question but do you tip the drivers? In a past life I dabbled in dashing and not tipping is cruel

Yes, exactly. It is all explained through the channel and bot, a pretty seamless process. Unfortunately at this moment we don't support alcohol. Also, no we don't tip the driver unless the customer wants to which is something you would have to cover as we only discount the total before the tip.

You can't do pick up?

We support pick up but the discount will be reduced to 45% to make it financially worth it for us.

much love ty, did a dash order and everything went smooth. will prob never ever order DD without ya again now lol

Tanman - December 26, 2023, 11:19 am

I think this is the first time I've seen a B4U service advertised in HF. Lol GLWS! I already ordered my lunch today, but I'll join the server and order in the near future!

I've used this service almost ten times since I saw it. [Varane](#) is a GOAT.

Just wanted to give a vouch, I ordered with Hell's Kitchen two days ago. The process was fast and simple, and I got my food very quickly. Definitely recommend! and will definitely use again

It always says closed for US. When does it come back?

We are usually only opening in the evening at the moment EST. Pay attention to announcements to know when we open. We are working on improving our times and the hope is to be consistently open all day within the next few weeks.

Posting to come back later when I need to get some grub!

Good luck as you get things more streamlined! Might have to place an order myself today as I don't feel well enough to leave the house. ??

Pretty sure Doordash services are banned on HF.

This thread has been alive for two months, I don't think they are forbidden.

Mooooookie - April 7, 2024, 10:51 am

Never knew this service existed on here. This is definitely something I will be taking advantage of.
Can you get 50% for GrubHub too? Or only DoorDash?
