Thread: [HQ non-VOIP - SMS verification service \\$\\$\\$BTC](#)

Exgroyper - December 13, 2023, 9:39 pm

I used to be a loyal user of phoneblur until they were bought out by literally the worst developers ever. I haven't had much luck with some of the more popular services on here a couple months ago but if one is really good now I am open to that.

Basically I need a dedicated # SMS verification service that at least is good for 30 days but I would prefer to be able to continue to renew infinitely. I want to be able to use the 1 number for more than 1 website for verification as it is an unnecessary hassle unless thats impossible (which I doubt). Also obviously want the possibility to buy more than 1 number if needed. None of that "warm up/wake up" the number BS either. Needs to be reliable, work for all major websites, no VOIP, no google voice, no cheapo burner app type number that gets detected as such.

Paying in Bitcoin. Must use a contract. I will not use discord and will only use Telegram under very special circumstances with extremely trusted members. Need this ASAP, PM me
[contract=tid]Start Contract[/contract]

What country do you want for the number

Sillee - December 14, 2023, 5:25 am

How many phone numbers do you need?

auloaulo - January 28, 2024, 10:07 pm

I can provide you infinite of them @auloaulo on telegram
