Thread: Access chrome extension wallets

neonbytes - *December 14, 2023, 4:40 pm*

hey guys
i got a Chrome Binance Extension Wallet files using a stealer
i wanted to import it on my Chrome to see if i could open it, but failed

my steps were
1. install the extension on Chrome (from the store)
2. copy the extension data folder to these folders:
\AppData\Local\Google\Chrome\User Data\Default\Local Extension Settings
\AppData\Local\Google\Chrome\User Data\Default\IndexedDB

it was always stuck on loading
any ideas on how to import extension wallets data on chrome ?
thanks

fair enough
someone else? any ideas?

Honestly, I'd have to look at the extension and how it stores data. If the stealer decrypted the wallet files, they would have to be re-encrypted. If it did not, you will have to do the decryption yourself.

Keep all conversations on HF and only make deals with contracts in place.
