Thread: [Anyone use Concrete CMS for their Adult Tube Site](#)

Norman Kok - December 16, 2023, 1:16 am

Hi Guys, First timer...

Was wondering what platforms(CMS) people were using for their Tube sites and why?

Nemo5 - January 25, 2024, 1:09 pm

Some popular platforms are:

Joomla

Why? Because it is a robust CMS that suits larger projects. It provides a solid foundation. Extensions like 'HWD Media Share' facilitate video management.

Clip-Bucket

Why? It is specialized for video sharing.

Adult Script Pro

Why? It is tailored for adult content.

Some features are supporting memberships and monetization.

PHP Melody

Why? It is designed for video sharing and monetization.
