Thread: [Lethal Drainer - Referral System - Earn a % of each drain - Earn Thousands!](#)

tornadocash4556 - December 17, 2023, 8:43 am

Hi everyone! ?

Lethal Drainer is a project designed to provide hackers with a DaaS (Drainer as a Service) access, this would allow for you to set up custom phishing campaign and allow for users to connect and have their funds drained.

Now if you do not want to do this and know someone who does this, and are in need of a quality product, you can send them your referral link and earn 3-5% off each drain they make, if they make \$100,000 off draining that's \$3000-\$5000 from doing nothing but send a link.

In order to generate your own Lethal Drainer referral link such as this one:

https://t.me/lethaldrainer_bot?start=260

Go on telegram, join @lethaldrainer to be notified of Lethal's newest announcements, and message @lethaldrainer_bot

Make sure to register your withdrawal address by typing "/register 0x..39", whatever your Ethereum address is, and then type "/user"

and you will be provided your very own referral link to provide newcomers to Lethal!

If you would like to track view drains made by individuals you referred and track referral-related information, type "/ref" and if they did get drains you can withdraw your % to your withdrawal address by typing "/refwithdraw".

It's super simple, the only catch here of course is it's tailored for users engaged in cryptocurrency phishing campaigns, but besides that it's a great opportunity for who has people around like this and wants a piece of the actions all by just sending a link.
