Thread: [Crypto gateway with webhooks/IPN?](#)

Lor?d - December 18, 2023, 5:37 pm

In the past I've used CoinPayments but as they've decided to kick most of their users to the curb with the US restrictions I need a new one now.

Can anyone recommend a good payment gateway for cryptos that has webhooks and/or IPNs? Preferably one with low fees where funds can be cashed out at any time.

Have you looked at [NOWPayments](#)?

API and webhook functionality with IPN notifications. More info here:

I have a referral link to if you want it drop me a PM (I have no idea if it gives any benefits).

This looks promising, I don't see any geographical restrictions but I might just be missing it, do they allow US customers?

I don't mind KYC as I intend on using it long term for legit income, I just don't wanna deal with setting up the API/IPN and end up having to drop support for it if they don't allow US customers

Have you considered Coinbase Commerce?

I have not, I'll take a peek at that one too, thanks for the suggestion!
