Yeah, have a couple tools as well, but they often get unexpected detection, so they are not very safe to use.

Probably will put them on sale as well, but they are not so HQ like this one because this one is 100% safe.

If you want, I am able to provide you with this unlimited zoom voucher copy for a month.

Reviews would boost sales and give more motivation to put something on here. ?

No. Its just undetected because it touch only 1 very smart part of league of legends code which one is enabled to change by default because its zoom value u can do it with mouse, but this app can increase limit of that value.
