Received a vouch copy for this service.

Setup was quite easy and took less than 5 minutes. This IPTV has everything there is to offer.

Besides international live channels you are able to browse tons of movies from streaming sites such as Netflix or Prime. Highly recommend as your all-in-one entertainment package.

Just bought this:

The streaming quality is perfect. Even though I live in Australia, which is a world away from most servers, there's no buffering, and everything's in HD. There are loads of shows to choose from, and best of all the support I received from Blue Eyed Samurai has been really good.

Big vouch. Don't hesitate to buy.

It did take a bit longer than expected to re-activate a renewal but coming back for another year because the product is amazing, no buffering and a huge range of live TV, movies and tv shows

Yeah seems servers are down.

I reached out and still haven't heard back or gotten a "read receipt" for support, which is extremely unfortunate and frustrating.

I've been using this for over a year and haven't had any outages or issues but recently I am getting worried.

Hi,

We just reached out to all customers that contacted us and re-generated the lines.
The domain used for the service was taken down. Services have been regenerated.

For any customer that still can't connect, please contact us on Telegram and we will re-generate your IPTV service.

flakeyguy - April 26, 2026, 10:06 am

Seller gave new credentials + extended it for me as I hadn't regenerated earlier

For the record, this was never handled or fixed. Constant "message me, I'll take care of it" then goes dark. Deal with caution

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
