Testimonial Highlights

(Jan 9, 2024 11:06 AM)ikskwizit Wrote: [\[CITE\]](#) AnubiCode was kind enough to let me test this and before I mention the software, I just want to say how refreshing it is to deal with somebody so friendly, pleasant and responsive.

As for the software, it takes a moment for the file to be built, but I'm talking just a couple of minutes or so. After I received the file, I began testing. I started with a virtual environment that did have some available (but unimportant) data on it, since I knew exactly what was present and what sort of things it should be grabbing and whether it was able to do what was advertised.

The stealer was able to grab everything it promised to and sent it all conveniently to my Discord via a webhook. I then put it up against up-to-date versions of Windows Defender, Kaspersky and Avast which were running on Windows 10 21H2, Windows 10 22H2 and Windows 11 22H2 and none of them picked up anything suspicious at all, which was impressive.

The generic computer user won't be able to tell anything suspicious is going on when the file is executed. Sometimes you get a feeling something isn't right, like when you can tell something is loading, or the system's performance has suddenly worsened, but it was not the case with this at all.

You have to bear in mind, I was testing this, so I didn't have the full access a paying customer would have, so I know it only gets even better from this point, so I will be paying for a license very shortly.

All in all, if you want an affordable stealer that's not only great in terms of the massive amount of data it can get you, but that's also FUD (imagine not needing a crypter), then you should definitely buy this, AKIRA most certainly has my vouch!

Mnemonic - December 20, 2023, 2:02 pm

Good luck with sales. The product looks promising.

PitbulHolland - December 20, 2023, 4:12 pm

Looks interesting i want to try it

ONURIS - December 22, 2023, 11:41 am

Tons of Advanced Features

SIM-2564555 - December 23, 2023, 3:12 am

New Update V2.10:

- + MetaMask Decryption and Password brute-force.
- + Coinomi added to list of wallets.
- + Panel Improvements.

jmark7 - December 23, 2023, 3:18 am

You should release the panel Images.

SIM-2564555 - December 23, 2023, 10:55 pm

(Dec 23, 2023 05:51 PM)Dyne Wrote: [\[CITE\]](#) Hello,

You haven't specified if the stealer is hosted or if the customer self-hosts.

Any clarification?

Hello Dyne,

Regarding the stealer, it's a little bit different, the panel is web hosted for V2 and v2.1 is an executable panel where users can use it directly in there RDPs or PCs (this version will be released within the next few days with new features)
the subscription activation and builder are through Telegram bot.

The payload uses discord webhook for connection where you can manage bots using the Panel and discord as well. discord webhook helps to avoid AVs detection.

Once the new panel released i will share screenshots for the new features

ONURIS - December 25, 2023, 9:16 am

Panel v2.1 Is Released with new features

SIM-2564555 - December 25, 2023, 10:25 pm

? Introducing Akira Panel

After weeks of works, we're finally releasing Akira Panel! By running a panel, you will be able to automatically manage, view, download the logs that you receive by your discord webhook.

Main features:

- Access to your logs from everywhere
- Sorted logs from last infected
- View every client's data comfortably from the panel (Autofill's, Cookies, Passwords, Wallets...)
- Search on all logs by specific cookie or password
- Filter your logs by country
- Filter logs for wallets/passwords/cookies, etc.
- Add a note for every infected client
- Download all data with a single click
- Brute force MetaMask wallets using all client's passwords

Dark/Light theme available!

How does it work?

Akira Panel is just a single executable file. In order to make it run correctly you have to edit settings.ini and put your discord token and the discord channel id where you receive your logs. It will automatically upload every client you will receive on your discord channel.

Note: You should keep running the Akira Panel executable files otherwise your logs will NOT be uploaded. It is recommended to run the panel on an RDP server / VPS. Keep in mind that if you close the executable, you won't get your logs on the panel so please do NOT run it on your PC, just buy a cheap RDP server.

By default, it will run in LAN mode. You can run it on WAN and access it from everywhere by editing the first line of settings.ini. Remember to open the port 80 (HTTP) on your server, otherwise it won't be reachable outside your network.

What about the price?

Akira Panel will be free for every new customer.

who buy Akira Stealer lifetime license (\$150).

This mean that customers who buy the 3 months license won't get access to the panel.

All existing customers who purchased the license for \$75 will have to pay an additional \$50 to gain access to the panel.

? If you have any question or you wanna buy you can DM

That's just him being cautious in the TOS and rightly so. You could say this about any software being sold, even anti-virus software, it's why companies offer aftersales support - there are so many variables when it comes to operating systems that nobody can guarantee it will definitely work on every system. I think it's safe to say it will work on the vast majority of systems, but he's leaving room for the small minority in which it may not work and I don't see anything wrong with that.

MySadness - January 9, 2024, 8:07 am

Whate is the depedency of this stealer ? is it native ? or which dotnet version need to run it.

Riddick - January 9, 2024, 10:06 am

AnubiCode was kind enough to let me test this and before I mention the software, I just want to say how refreshing it is to deal with somebody so friendly, pleasant and responsive.

As for the software, it takes a moment for the file to be built, but I'm talking just a couple of minutes or so. After I received the file, I began testing. I started with a virtual environment that did have some available (but unimportant) data on it, since I knew exactly what was present and what sort of things it should be grabbing and whether it was able to do what was advertised.

The stealer was able to grab everything it promised to and sent it all conveniently to my Discord via a webhook. I then put it up against up-to-date versions of Windows Defender, Kaspersky and Avast which were running on Windows 10 21H2, Windows 10 22H2 and Windows 11 22H2 and none of them picked up anything suspicious at all, which was impressive.

The generic computer user won't be able to tell anything suspicious is going on when the file is executed. Sometimes you get a feeling something isn't right, like when you can tell something is loading, or the system's performance has suddenly worsened, but it was not the case with this at all.

You have to bear in mind, I was testing this, so I didn't have the full access a paying customer would have, so I know it only gets even better from this point, so I will be paying for a license very shortly.

All in all, if you want an affordable stealer that's not only great in terms of the massive amount of data it can get you, but that's also FUD (imagine not needing a crypter), then you should definitely buy this, AKIRA most certainly has my vouch!

ChrisDubai - January 10, 2024, 3:15 am

Pointless - March 5, 2024, 5:56 am

A short review on this purchase of mine

Ease of use ? : 9.5/10

You can get your client working in a few minutes, a VPS/RDP is not needed since you can receive everything through discord, I do recommend buying the 150\$ lifetime in order to receive the visual panel since it will be easier to sort logs when they come in big numbers.

Encryption/FUD: 9.5/10

I am impressed to say the least in terms of detection it shows a 4/21 runtime detect (3 if we exclude Comodo who will flag anything that isn't signed and contain it).

<https://scanner.to/result/6KaKFxuVmdSK>

This is taking into consideration it's probably been some time since it's last update, results are probably even better when freshly updated.

Features: 8/10

It does what it says it does, it even includes a optional clipper, I still wish to see it grow into a more feature rich stealer but it already does a lot taking into consideration it must stay FUD by itself.

Price? : 11/10

Absurdly cheap, I don't know if prices will change in the future but 150\$ lifetime it's very good, it wouldn't even be a bad monthly price taking into consideration it's kept fud by dev thats a lot of money you save on encryption.

Workhard3105 - March 6, 2024, 2:19 am

Buied the lifetime licence

1, The bot is not fud lol

2, The bot close Chrome victim the lot of time so it's detected

Why it's not fud? I'm looking to get it, can you post scan result?

praten - April 15, 2024, 9:09 am

Been trying to contact OP and nuoxetin on TG but never been able to get a response.

Impossible to buy the product.

Also OP doesn't refute claims of his stealer not being FUD...

Where is OP?

Village8 - April 18, 2024, 2:22 pm

How does akira handle the 2fa? Because most of the accounts are using this...

praten - April 23, 2024, 9:16 am

After 8 days still no response from OP or nuoxetin on TG.

If this thread is no longer active it should be closed down.

OP was last online March 21st 2024, more than a month ago...

RavenBro7 - April 23, 2024, 4:50 pm

Do you offer a tutorial for complete newbies as for how to use Akira?

uzi69 - April 23, 2024, 6:23 pm

is it only for windows ? or it works for mobile too ?

SIM-4785691 - May 22, 2024, 2:16 am

Ban him

Scam

Dev disapear and not connecting anymore

Dont use : your telegram will be banned

bequat1998 - May 23, 2024, 6:26 am

Are they a scam? Can you give me your telegram to ask?
