All loads are unique and come directly from our landing page(s). Execution rate is high!

You are paying for each download from our landing pages. We track each download and provide them with different stubs based on our queue.

100% Execution rate is not possible this way but it guarantees that downloads are unique and not shared! Average Execution Rate Is Between 70-80%

You will be provided with a private webpanel link where you can monitor the progress and statistics of your downloads!

MIXED CPU / GPU WORLDWIDE STREAM : \$0.45 per download (100 minimum)

GPU/CPU ONLY STREAM COMING SOON!

To purchase please first open a contract then message me on telegram ?
