Consider accepting other payment methods.

GLWS.

We utilize a third party Gateway that accepts USDT into their platforms wallets and instantly exchange it for another crypto of our choice and withdraw that to a totally different wallet.

Costly but Safe.

I have a few questions;

1. What is the assurance that logs are sold once?
Say I purchase some logs, will they certainly be unavailable to be sold to others? Will they be removed from the system?
2. What happens if some of these logs are incorrect, probably the passwords has been changed since you last checked. What will happen, will you refund? Is there a way to contact you to do that?

I will appreciate honest answers, and I'm sure others will too.
