Thread: [anyone else here play Cyberpunk 2077?](#)

bigfatjoe - December 30, 2023, 10:59 am

I started this game called Cyberpunk 2077. I got the Xbox X for Christmas. Super great console I love it.

Cyberpunk is my first game. I just set up my console two days ago with a new TV since old one broke.

Anyone else play Cyberpunk and what do you think of it? I say it's a masterpiece.

was thinking about getting it as it's been on sale plenty of times on steam, just not to sure if my computer can run it smoothly. i have a 3070.

That's cool. Why do you prefer PC gaming to console? I like both but just wanted your opinion.

well, that's a good reason

I played it a handful at launch and really enjoyed it. Don't get me wrong, it had a bit of a rocky launch and more so on some platforms than others, but I personally didn't have too many complaints. I just recall being into multiple other games at the time or soon after so got pulled away from it. Since then though it's gotten multiple huge updates as well as a hefty DLC / expansion so I 100% plan to go back and play it again as well as in full. You picked a good time to jump into it following the above mentioned stuff and I hope you enjoy it!

Bro that's basically every game nowadays though ?

It's only going to keep getting worse too. Games about to be hundreds of gigs in a few years ?

Haven't played it.
Don't think I will.
Read some things about it, that I dislike.

Hmm, you're vagueness has me curious lol. Care to be more specific ?

And just so you know you don't have to worry about this, I'm not the kind of person that's going to try and counter all of your reasons and try to convince you otherwise about it haha.

I guess it's not exactly a game I'd be trying to fight a ton for anyway. I only played it a handful during the month after launch and haven't touched it more since ?

I enjoyed my time with it, but didn't play it enough and even more so not recently enough to give it a proper current day rating/review. I'll definitely dive back into it in the future though, especially given the updates and expansion.

You should. I am a little over four hours into it and it really is a masterpiece.

It's up there in the games I have a backlog for that I want to hit. Another one is Elden Ring though and I don't know if I can justify not going back to that first given how much time I already put into it, how much I loved it, and how much I CAN confidently say that game is a masterpiece haha. Make no mistake though, Cyberpunk's day will come for me, 100%

Cyberpunk is a great game. Especially on pc with good hardware. I havent played the dlc but I did the story and sometimes go back to emerse myself in night city every now and again.

The DLC is one of the main things that is making me want to return to the game sooner than I otherwise would have. I've seen that it and the free update which came alongside it add a TON of new stuff to the game as well as overall/improve a ton of the base stuff the game had already.
