Thanks. It's still in early stages so not sure how much the accrued tokens value will amount to, but they're claiming that all participants during the invite-only stage are earning towards a piece of network ownership for the wider release. This is why I think it's a great opportunity to get involved early.

I signed up, I'll give it a shot, not too sure how keen I am on the idea of someone using my network

as a proxy but hell let's see how it goes

Yeah, I had this reservation too, though they address this concern here:

<https://www.getgrass.io/blog/grass-102-q-a-on-privacy-and-security>

Their policies basically state that they loan your IP out, alongside 0.3% of unused network resources, to data scientists which have been vetted by the Wynd Network.

Tried it..it just couldn't connect, even when trying different networks. There is no information about payout or such..

Delete my account after 15 minutes. If anyone else gets this to work and has some proof I will gladly reinstall it.

You're the only one that I've seen report this issue. Works fine for me and the 10k+ people in the Discord channel. Probably best to avoid if you're experiencing issues already.

I did notice some issues with connecting last night around the same time I saw some people in the Discord discussing points disappearing. They were saying there was some changes being made to the site that potentially affected it. I was able to reconnect again after about 30 minutes.

As far as information about payout, right now there is none at all. Shares are given in what seems to be so far an unlisted and unbacked altcoin. I've been unable to find any more information about it myself, however I don't mind letting it run in the background and seeing where I end up with it. Might end up being worthless or making a few bucks but it doesn't hurt either way.

Kinda looks like packetstream. Will take a look, thanks for the info !

Skepticism surrounding how earned tokens will translate into actual profits when the network goes live are perfectly reasonable. I actually think the Wynd Network doesn't even know this themselves yet, so most early adopters will have the same doubts.

I think for me the premise of the economy seems to make logical sense, and so I hold some optimism it may play out to be favourable for those that get involved early. The emergence of GenAI has put huge demand on resources to support the ingestion of AI training data. Much of this training data is online and therefore difficult for data scientists to automate the scraping of, due to common network blocks that prevent harmless bot activity originating from standalone IP addresses. This presents a logical market for the sale and usage of residential proxies, which I think the Wynd Network have tried to capitalise on with the Grass platform.

For anyone that has deployed the Chrome extension already, there is an update. It is now 3.0.0.

To update it, go Manage Extensions > activate Developer Mode > and click Update in the top-left.

Once updated, when you click the extension it may briefly present a little black box pop up. To resolve just disable then re-enable the extension.

Seems good, will try it over my pc on home

jordana - January 15, 2024, 7:39 pm

grass is a scam. they have been public for months and the coin still have 0 value, you can't withdraw anything from it.

Quite likely true. Thanks for your input account with 3 posts.

how much are u making from this

Majestic12 - February 11, 2024, 12:20 am

I personally have no interest in doing this personally, but it's an interesting concept and hopefully it does translate to cash for users down the line.

Jam1e - February 21, 2024, 2:29 pm

Thanks for sharing this, it's kinda interesting. I've just signed up for it. Planning on giving it a bit of a test drive for a week, and see what I think.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first

post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

I dont know why but these kind of programs dont actually make it big or they end up seizing funds by ending their operations abruptly.
