Goodjob, you showed how to make it less obvious. Usually scammers just go full in with phishing links but this method has some nice touch added. Thank you

Haven't touched phishing in a minute but I'm definitely due to run a few tests with this.

Thanks..this is like DNS attack and phishin for the creds. Nothing new about it..but i guess its a good walk thru for newbs. This would work for anything really as long as you can fool the target into thinking the page is real.

Thanks
