Thread: [BTC Transaction Unconfirmed for 4 days - I've tried speeding up - no luck?](#)

Black Kodak - January 2, 2024, 7:39 am

Anyone have any ideas? Transaction pending (unconfirmed) for nearly 4 days now.. I've tried speeding up using various tools with no luck.

What's the Sat/B fee you paid?

Truth - January 2, 2024, 1:34 pm

link the TXID

some mempool were down and exchanges/wallets were giving wrong fee estimates

this seems more accurate

<https://bitcoinfees.net/>

basically BTC fees are f*cked. Use lightning or larger blocksize chains like BCH/BSV imo

Not 100% sure but it says 34.95 sats/byte on the fee rate line.

Pinged you it..

Someone messaged me and mentioned mempool.space accelerate option, but the fee is like \$50.. to speed it up lol

You will wait forever with 35sats check fee before sending it like Focus said you can use RBF(replace by fee, will help you to increase your fee)

I tried to help OP as well, but we were having hard luck to accelerate his TX.

Whats the transaction ID? I could help you speed it up if it hasnt worked already, although if you put an extremely low fee you're going to need to wait for it to send back or put more money into the fee.
