Thread: [Want to spy my gf phone](#)

BlueSkylamHigh - January 3, 2024, 3:55 am

Hello everyone!! I would like to ask someone who is really in these things, what is the best and easiest way to spy my girlfriend phone? I have access to the phone and its iPhone and I am with Android... What app do I need and how to do it ? Thank you in advance.

Evading anyone's privacy shows you have no respect for that person. Being in a relationship, you should have access to her phone whenever you want. If she denies you physical access, I would probably question things.

Either your girlfriend deserves someone better than you, or you deserve someone better than your girlfriend.

Trust is what builds a successful relationship. Not secretly spying on one another.

I think it is best for you to let her go...

As everyone else has already said. You shouldn't be in a relationship with said person if you do not have trust in them. This applies to everyone

If you are doubtful of her, you should confront her and then analyse her response.

Any means of sus should just go and end the relationship, she defo got eyes on someone else?

You want to spy on your girlfriend just because? Women deserve better.

As an Android user, you may not realize this, but you can't install any app that you want on an iPhone. They have to go through the App Store's approval process. Maybe try a parental control app. It will be limited, and if your girlfriend finds out, she should press charges.

This is a classic, whether it's about invading your girlfriend's privacy or realizing that she's actually a liar, I had this type of problem a few years ago, so I decided to see her messages, and indeed my suspicions were true, the girl corresponded with other boys at the same time, it is hard to realize that the girl you like is a bitch, but as the famous Niccolò Machiavelli said "the end justifies the means" used to say that a desired result is so good or important that any method, even a morally bad one, may be used to achieve it. when is about you honor.
