Thread: [Any face verification boths to get verified on \[BRAND NAME REMOVED\]/bumble etc?](#)

csgoPlayer - January 4, 2024, 3:53 am

I want to get verified on [BRAND NAME REMOVED] but my pack does not have any such pics in those poses.

Any way that i can get verified using some external apps/websites?

sarkoo - October 13, 2024, 11:47 pm

You found a way? Thanks

You should look into making your own "packs" using open source AI image generation models. You can manipulate their poses, clothes, hair and give them voices with AI tts models. I've made high quality realistic "packs" of my own using those free AI models just run it locally on your pc.

Find [BRAND NAME REMOVED] verification photos and face swap your model to them - try to verify that way.

Hey could you kindly give more pointers, what AI software have you used?what prompts/methods?
Thanks
