Thread: [One week mining XLA \[Profit, Experience, Excitement\]](#)

SIM-5455545 - January 7, 2024, 2:13 pm

Profits: 15,000 stonks

Current estimate: \$7

I mined like 75% of the time.

Added my first 1tb phone coming to the collection.

Added a duster and tool kit for all devices.

This year is looking like easy sells, 1st of many. ??

Do you believe that XLA has the potential to become a major innovation in the realm of cryptocurrency?

If you are reading about XLA at this time just know that rescanning is a thing. It means you have too much money XD. Nah but there are trading pairs and more people will jump the API it will be like a flying saucer.

Low maintenance. I will spend 1 minutes dusting next week.

As pleased as always.
