Here is my super quick peanut sauce pan with rice and meat of your choice

- 1.first add some oil to the pan i prefer olive oil
2. chop 2-3 onions however you like and throw them in the pan
3. add 2-3 cloves of garlic cut them first.
4. cook rice in a pot in the meantime!
4. then add meat of your choice i prefer duck or turkey. But you can also use beef, pork or squirrel. Whatever you like.
5. throw in a bag of frozen vegetables of your choice
6. Add 1 can of coconut milk
7. add 1 peanut butter

That's it! Then put the rice on the plate the mixed pan with the sauce! and enjoy!

Try it out hope you like it! ?

Your culinary approach is good and swift, my brother. This could be refined with variations. We could experiment with that quick recipe with exotic spices.

I want to try this out tonight. This will definitely leave a lasting taste impression on me.

Thank you so much for sharing.

I added Cayenne Pepper, a subtle heat that added a kick ?.

Have you thought about adding chives or some fresh herbs?
