Update:

AUTHORITY EFT: Updated security
Better render Better performance
All known bugs have been fixed New type of item display (optional)
Fixed chams, now two types work correctly, the main thing is to include them before launching into a raid Now when you turn on the display of active quest items, everything that is needed is shown correctly.
Completed subtasks of quests are now skipped and items for them are not shown Loot, containers and corpses have been slightly redesigned
Updated loot prices

What are the ban rates like using this

So far none of my customers (I operate on other sites) have been banned. But u never know when BSG could hit with a ban wave. It's a very safe cheat and doesn't have crazy rage features. As long as you play legit and don't end up with 30 k/d, you should be fine!

I might be down to do the vouch copy.

I will let you know I have a heavily aged and legit played EOD account. So if I catch a ban for cheating on it after just 1 day of cheating it will be super obvious where the ban came from and my review will absolutely reflect that.

No review still? Interested in seeing what they had to say

Juxtapoze - January 19, 2024, 10:56 am

If you still need a solid review I would most definitely leave an in-depth one over the weekend, I'd have to buy a new account too because I wouldn't want to test it on my main, but if you are interested let me know brother, I would love to check it out in an exchange for a vouch copy.
