HANKK ? - February 27, 2024, 9:41 pm

Using byte crypt actually increased my detection rate for an otherwise easy to crypt file. Not sure if im doing something wrong but I tested it 3 times ensuring to follow EXACTLY the very tedious instructions included with the product. While it has always been required (since 2012) to use multiple programs in this product, you are now required to run 3 extra obfuscators on top of the ByteCrypter program itself. After testing three times I was not only given an increased detection rate every time but not able to bypass even WD. Below are my (best) results.

Hi I have a question regarding Bytecrypter. Does it produce fud all the time, and when was the last time it was checked for a WD bypass?

If I buy the 3months autobuy, do I receive download/instructions automatically, or do I need a contract with you? I am thinking about buying the 3mo or lifetime.

themrt3000 - March 2, 2024, 6:25 am

Hello Sir i send you a private link with the purchase please contact me

Hackers - March 3, 2024, 5:56 pm

I am noticing that you don't guarantee any FUD or WD bypass in the thread information.

You said the other day that you had FUD scan, but I am wondering if you could share any links to recent scans?

If I purchase this, can I expect to receive a FUD scan that matches the checksum / sha hash value of the program you give me to verify this?

I dont know if i did a previous vouch, but imma do it now.. This crypter imo is the best out there, so easy to use.. And it does the job, and it does it GOOD... And for that price, its a straight steal... I bought lifetime. For you guys that doesnt want anything to complicated but something that gives you like 0 on virustotal.. This is the one.. Big vouch.. i use this crypter like 6 years ago, i imagine was another version not version 3 then, in that days they fud last for like 2 hours day max 6 hours, and the new updates always arrived with a txt and a rtf with exactly the same content of the text(supposed haha)

maybe im just tripping and was another project, whatever, i wanted ask how much time are the lasting the fud aprox, and how much time take the refud to be delivered, btw, thanks for your prices are amazing! :)

One more things, should be great if you can add a couple of images to the thread, all looks too simple and i know this is not a simple crypter haha, you know how we are the skids, we need looks everything fancy hahaha just joking

Kind Regards!

For 2 weeks now you have been wasting my time. I paid you and you have been making yourself unavailable since then. This guy is full of crap loading old methods on rdp for me to figure out. I could have bought Razor by myself cos that's all in the crap you put on there. At least fix, the Razor to work properly.

Still have not received what I have paid for. I have not received a FUD file for my rat yet. The one he sent me was was detected anyway. I will update once he actually gives me a fully fud file for my payload!

0/10 service I respect the effort for trying but he cannot get you a FUD file for your rat or anything I would not recommend purchasing from him. Save yourself 65 bucks or 35.. Waited 3 weeks for a FUD file he sends it many times and its all detected.. Dont buy.

It's unfortunate that I have to buy a service but still can't use it directly. If I want to encrypt a file, I have to send it to you and wait a day or more for a reply. That's frustrating—there's no tool I can use myself like with other services. Also, I have no way of knowing whether you're adding a loader that connects to your own server, which could potentially give you access to all of your customers' devices. ?!!!

"My bad experience with this service: First, the scan

Yes :)

Dear its a public paid crypt and public paid/shared stub crypts don't bypass WD Smartscreen
If you want best top notch crypting results like bypassing WD and smartscreen you go for
Private/Unique stub option.

If you are interested in private/unique stub crypt you can let me know i have options available at
