Thread: [HOW TO BYPASS ICLOUD ACTIVATION WITH SIGNAL WORKING?](#)

psykillerz - January 10, 2024, 5:40 am

pls help me i have an iphone x phone i bypassed with broque ramdisk but i want to open phone call and reactivate the faceid,touchid and passcode

Theseus - November 7, 2024, 10:13 am

What are the paths of the activation files? Which files do I need?

Here the answer

/private/var/mobile/Library/FairPlay/ (the whole folder which should contain IC-Info.sisv)
/private/var/Containers/Data/system/*/Library/activation_records/activation_record.plist (0666)
/private/var/wireless/Library/Preferences/com.apple.commcenter.device_specific_nobackup.plist
(0600)

Edit: in SSH ramdisk /mnt2 equals to /private/var

Only paid service will activate the serial for signal.

justin grams - June 2, 2025, 6:15 am

Ok I understand a fraction of what was said like I can barely use a computer lol but iam willing to pay somebody to give me step by step information on how to do this
