Thread: [how autistic are you?](#)

flyingduck - January 11, 2024, 10:32 pm

hey everyone,

just curious, how much autism is in you?

<https://www.idrlabs.com/autism-asperger/test.php>

cheers!

Syndicate - January 11, 2024, 10:52 pm

I thought it was going to be a little bit worse than this. But I am also watching a show on the side as well.

"Your autistic/Asperger traits are low (37.47%).

You have significant autistic/Asperger traits according to the RAADS diagnostic criteria."

flyingduck - January 11, 2024, 11:37 pm

i just realised i should've screenshotted mine aswell x)

try it sometime again, when you're focused for a few minutes. would be definitely interesting to see how much that changes results.

i usually take online tests not 100% serious but those tests are said to be good to find indicators.

Maskin - January 12, 2024, 10:55 pm

Low 39,5%

I guess I'm a little autistic. I don't think I am but I wouldn't be surprised if I was ?

an4l 1st - January 13, 2024, 5:54 am

Your autistic/Asperger traits are very low (9.65%).

You do not have significant autistic/Asperger traits according to the RAADS diagnostic criteria.

Jamika - January 15, 2024, 5:07 am

I feel that i have some syndroms, but i knowna lot because my son is autistic indeed

Chroon - January 21, 2024, 10:57 am

I got an actual autistic person to take this test who got 9%

Amnesiac - January 21, 2024, 2:13 pm

I'm diagnosed autistic but got just 28.3% on this test

Hackers - July 23, 2024, 3:20 pm

It's totally possible your friend answered in a way that reflects how they feel, and not how they actually are.

I don't know how accurate this is, but it does feel pretty close to the truth. Some of the questions (and this goes for all tests I take) were answered differently because they were blanket statements. For example, there are questions about knowing something about a social setting. This is a tough one because knowing about something and doing something about it are two different things. For example, I may know 100% that I am talking too much, so I would score low on the autism spectrum test... but that doesn't mean I will actually stop talking. That said, knowing something and being aware of something is more to do with the brain, whereas behavior can be learned and practiced. For example someone with low functioning autism can show better behavior than someone who is considered high functioning.

Anyways, I do not act or feel the same in every scenario. Something I'd like these types of tests to do better with is context - where are we? at work? at home? at school? Who are we with? Family? Alone? Friends? These types of things can change an answer from fully disagree to completely agree.

very relatable. those tests are just a indicator. the real ones take at least 2-3 hours with a psychologist.

however some questions are asked differently, that answers the setting and unsure part.

generally speaking, the best advice on those tests is to use the first thought that came to mind when you read the question. those are usually the most accurate answers you can give ;)

Pr0m3th3us - July 23, 2024, 4:00 pm

Well I'm boned

Welp. 53.04% Autistic. Imao, I was diagnosed with Aspergers a year ago.

F4tDoinkz - July 23, 2024, 10:59 pm

I don't wanna take this and find out how retarded I really am.

Lil Buddy - July 27, 2024, 2:03 am

<https://ibb.co/JKC9fX6>

I have diagnosed Asperger's so i would of expected more tbh

well, it's basically proving what i said before, once your reach 50% you're most probably in the spectrum. if you'd achieve 100% -that'd be a bit concerning. no matter which test i do or how many times i retake it, i usually score inbetween 58-62%, never below and never above it - i'm also

diagnosed.

big markyb - August 1, 2024, 9:58 am

76% lol just did the test fuck that test

flyingduck - August 1, 2024, 11:56 am

tacticalcatboy - August 1, 2024, 8:01 pm

autistic enough to get bullied growing up just because i had different hobbies and interests that i ended up developed BPD from that trauma. which to this day I still have all this creativity stuck in my head with no way of getting it out.

thrutl - August 14, 2024, 3:24 pm

I wasnt expecting this on the Language part at all, and I expected more on the interests..

<https://imgur.com/a/2ltuB6W>

Your autistic/Asperger traits are average (52.16%).

You have significant autistic/Asperger traits according to the RAADS diagnostic criteria.

sebn - August 27, 2024, 9:36 am

i am etremely autistic and proud of it
