Nice free service you're offering man, I'm sure a bunch of members will be happy with this.

I've often thought

Why charge for something AI could probably generate.

Hi, can you make me an avatar

Theme an evil eye with a raven as background lots of dark but tinted with light then 'Betrayal' written through it all. Thank you

**Popular** - January 20, 2024, 9:35 am

Wow awesome of you to do this!

I need an instagram profile picture saying:

"Lazarus Diecast"

Make it based off hot wheels/diecast cars theme with orange/blue color.

I wouldn't necessarily call AI generated content Graphic Designs. Taking what someone asked for and pasting it onto MidJourney isn't exactly a graphic design service.

I'd say this it would be more accurate to offer this as AI Graphics service for free.

Never said I use AI ?

I'm saying this service is free because why charge someone something that (THEY) can probably do them selfs.

Maybe read more carefully next time ?
