1. What are the payout options?
 - Stripe, Paypal, Bank Transfer
2. How often is the payout?
 - Depends on the platform, one is per week, one is per two weeks.
3. Are we getting payout from people or company?
 - You get paid by people, but the payout is from a company.
4. How much is the investment required?
 - You don't need a single cent as an investment.
5. How much time is needed for the setup?
 - You can be ready within an hour of reading this guide.
6. Is it possible to get saturated?
 - Not really, as there are multiple target audiences that don't overlap with each other. 100 people could do this at the same time without the target audiences overlapping. I can explain it in detail on telegram.
7. Is it scalable?
 - It is scalable, either through Virtual Assistants or friends.
8. Is it possible to automate?
 - It is possible to automate, again with either Virtual Assistants or friends.
9. What device is needed to make this up and running?
 - The initial setup I'd suggest a PC, but you could still do it only with a phone.
10. How much daily maintenance time is needed per day?
 - 2-3 hours per day would be enough to earn at least \$200 a day.
11. Are we exploiting a website?
 - No.
12. Did you discover it yourself?
 - Yes, I'm the only single person doing this as far as I know.
13. How long have you been using it?
 - I have done this for the past few months, without a trouble.
14. How much have you earned so far?
 - Over \$70000.
15. Does it work worldwide?
 - Yes, as long as you have access to a Stripe, Paypal or Bank account. If not, I'd suggest using a open-up service from this forum and you can still do it.
16. Is it blackhat or whitehat?
 - It is grayhat, it is unethical but legal.

Hey just a heads up you can't mention competing forums like the one mentioned right below the graphs, I would advice you to read the [Help Docs](#) so you don't get warned or anything like that

If someone can give a review of this product, it would be great.
