Thread: [FIND YOUR PERSONAL REQUESTS IN MY LOGS \[2 BILLIONS LINES\] + FULL LOGS](#)

**Azazlo** - January 20, 2024, 10:07 am

Base of about 2+ BILLION was collected from such sources:

- Dissemination, private clouds, instals (exchange, youtube), buying logs.

I have only url:login:pass

I keep records of strings sold and do not sell your strings repeatedly (if you do not give good on this).

Your requests do not leak.

Give both on the processing and the repurchase string. Percentage discussed individually.

No fixed price to redeem the string. All discussed in person. But usually not less than 0.04 per line

The minimum purchase amount is \$50

Some words about price:

Price depends on request and count of lines. But usual price 0.04 per line (Where total amount of lines is 2000-10000) and minimum 50\$. If there are few lines (Less than 500, then it is discussed in detail).

Some words about work process:

I have base ( url:login:password) . You can give me your request, i sorting my files for your request, say number of lines. We are discussing the price. Requests are needed without access to mail, because most likely most of the mail is already non-working

I sell only those requests that comply with the forum's rules!

Example of work:

Telegram - @Anigma1

Discord anigma1

Jabber

anigma@potato.mx

I have topics on more than five forums with vouches

**Azazlo** - January 25, 2024, 7:57 am

I would like to say a few words about what has now become of the url:log:pass sales market, especially to the sellers themselves:

I myself have seen these public distributions of 200kk, 180kk lines of url:log:pass, but how were they obtained? From my own experience, I realized that 99% of these lines are garbage. How they are made - either just generation, or by replacing passwords, but 90% of accounts from these lines will either be invalid or do not exist at all. At the moment quantity != quality. I can be sure of the origin of my lines, since I personally collected almost 90% of my database from real logs

**michael9** - April 16, 2024, 11:01 am

hi any vouches I can get???

Dear friends, as you know - some big forums were closed. Don't know if they'll be back, because Sellix was closed too, and they deleted their discord server. One forum continues to work, but 90% of it hasn't closed, because it's already working with the FBI. Here are links to quite popular forums where there is my topic:

@logsorting - TG Channel

Posting bump on the thread will not bump your thread to top. You have to use the bump button located at top right to bump your thread. It costs some bytes & it takes your thread to the top.

<https://prnt.sc/TaciKG7W7ncf>

PS. Also I don't think advertising social channels/servers is allowed unless you are a V3ndor.

**Azazlo** - March 9, 2025, 12:12 pm

Hello everybody!

I'll be brief - I've created a bot for automatic search of strings. Price, of course, will be only \$1 per subscription - so everyone can use

t.me/LogsSort\_bot

@LogsSort\_bot

The bot has a separate database of strings that I don't use. In the standard there are collected lines from public sources - therefore quality is appropriate. The bot is designed for you to find new requests/test your services. The bot will still be refined, tested, and new features introduced.

For more and better quality you can contact me in personal messages - @Anigma1

**Azazlo** - June 2, 2025, 9:12 am

You can find links to forums where my topic has been for a long time, as well as reviews and an explanation of the essence of the work in the channel

**Azazlo** - June 3, 2025, 12:52 pm

This is the bump!

Also top up my base with good lines(Not a big amount , but really good. Btw - i paid a lot for that. But it much better then purchase generate lines in TG channel)
