Thread: [ALFA AWUS036ACM not connecting in VMWARE or VirtualBox](#)

ZeroTraces - January 28, 2024, 2:23 am

Just got my new Alfa AWUS036acm, I tried almost everything but I can't seem to get a wifi connection up inside my VM.

Any help?

Hello,

What do you mean by "I tried almost everything" ? Feel free to give us details of what you already tried

Besides, do you have any error message at the boot about the device ? Feel free to share more information

DramaKing - January 28, 2024, 12:35 pm

Post the output of ip address and lsusb.

After retrying it gives me this error code in linux mint

Failed to attach the USB device MediaTek Inc. Wireless [0100] to the virtual machine Linux Mint.

Failed to create a proxy device for the USB device. (Error: VERR_PDM_NO_USB_PORTS).

Result Code:

E_FAIL (0X80004005)

Component:

ConsoleWrap

Interface:

IConsole {6ac83d89-6ee7-4e33-8ae6-b257b2e81be8}

Do you think a dual boot with a non-vm install will solve the problem?
