I recently bought a ps3 to play older games on despite having a ps5 what are your thoughts?

Yes, I have a hacked PS3. It is really fun. At some point I would be very happy to occasionally play the old PS1 again....

diiaz - January 29, 2024, 4:21 am

Sadly not. I only play PC games.

Cant u play older games on ps5?

Lefty - January 29, 2024, 6:12 am

I still play my ps3 too, Jailbroken makes it a pretty decent system. Just download what you would like to play and install, also it's good for old games/emulators too!

diiaz - January 29, 2024, 6:17 am

I kinda wanna get an xbox 360 again just for the nonstalgia vibes.

Monero-chan - January 29, 2024, 1:27 pm

I do occasionally but its slowly fading out because emulation of said consoles is getting better.

It is a good device , really miss its days

Charlie Sheen - January 29, 2024, 2:25 pm

I don't. I miss playing some of them. I think about buying a Wii all the time. I've tried to go back and play my old super nintendo or sega genesis and I just can't get used to the controller anymore. They were so simple back in the day.

blackrose_x0x0 - January 30, 2024, 11:56 am

I still have all of my old consoles, but I play all the retro games either on my PC or Raspberry Pi. Having it all from one device is convenient and 8bitdo controllers pair well with Retro Pi.

I still have my Playstation 1 and 2, think I'm going to keep those stock/unmodded. I also have the

Xbox 360; I've been heavily debating opening up that one to mod and repaste as well.

Those Steam decks are supposed to be very high powered. Have you messed with his at all? I've been on the fence about getting one since they came out. My brother in law has one and he said it replaced all his consoles, that it's all he plays now. I think you're the first person on here I've seen talk about one.

Yeah I think he spent all his wages on it and then cancelled his share of the bills on me, so he wouldn't go into overdraft. Which wasn't even really his share but like a quarter because I'm nice to him and have been charging him fuck all.?He has a lot to learn about life. Nah I haven't checked it out. Guess I should huh? In fact the fucking thing should belong to me because he owes me well over a thousand dollars now from all the bullshit he did while I was out of town. ? He's in his 20s.

I've bought one a few months ago and I gotta say, it gets me hooked. It plays games well and the emulation is just *chefs kiss*. I do not regret the purchase.

I know when my brother in law was telling me about his, he said they are almost impossible to get because of how backordered they were. Has it gotten easier to order them? I think I could see myself picking one up.

If playing on an emulator can be counted as playing on a console, then yes sometimes I happen to fire up MGS1 or Crash Bandicoot on my phone ?

HOMODIN - February 1, 2024, 11:06 am

PS3 to play "older games", that makes you sound really young...

For me it's NES monthyl, it's just nice to go back to the innocent times...kinda just get disconnected from all the shit that's going on n it's nice.

Undead - February 1, 2024, 12:30 pm

I've actually been thinking about getting a PS3 as well. There's some classics that you can only play on the PS3 IT sucks that the PS4 is not backward compatible.

Nocturnal1234 - February 2, 2024, 7:47 am

I still play my Xbox 360 from since 2015

nd684d - February 2, 2024, 10:19 am

I still do, so much progress on my 360 that I can't leave hanging lol

DemonAsylum - February 6, 2024, 6:36 pm

I have multiple older consoles, but I don't play on them. However, I do play games occasionally from them either through backwards compatibility if on console, potentially on PC through Steam though it's not where I played them originally, or through an emulator that it's been made possible for on PC. I'll honestly probably always throwback to some older games no matter how old I get or what all new games come out.

We also still have old consoles like a nintendo 64 and a wii.

JW1337 - March 10, 2024, 4:00 pm

Yeah that's kind of how I am. I don't play games on the older consoles, but I will occasionally play an older game on a current gen console or PC whether through official means or an emulator. Depends on how old it is and what platform it was originally on of course.

blackrose_x0x0 - March 15, 2024, 11:14 am

For those that don't know, you can buy a Raspberry Pi and install RetroPie essentially turning your Pi into a retro gaming machine that can emulate most older consoles. I highly recommend it!

Ayeee no problem! Just a heads up, even though it can run N64 and PS2 games, you have to overlock it and even still, the performance isn't the best. That might not be the case anymore with newer models (mines like 5+ years old). But any and all consoles prior to those you're good to go ?

Appreciate the additional details and I suppose if anything did run noticeably poorly, there are thankfully still other options out there for those.

From time to time I'll break out the Nintendo 64 or the Gamecube. But honestly, I'll play it for like 1-2 hours then get bored of it.

uptoolategonzo - March 26, 2024, 2:32 pm

while I was In a structured facility you got to a part of the program where they let you have your own dorm and game systems I played the xbox 360 just to pass time till I could get a home pass that's the first week though the only game I was playing was called dishonored which is the first version and got back home and bought dishonored 2 (xbox 1x) and the game suffers from low fps performance.

Not technically, but basically haha. I think the more important thing anyway is the fact of playing those older games that originally came out on those older consoles. Many play on emulators including myself and obviously nothing wrong with that. What games you normally playing on there?

Tyler? - April 3, 2024, 2:07 pm

I still play retro games, just emulated. I'd love to get the consoles and physical copies of the games, but it's just too expensive for me to justify spending the money.

I just spent \$160 instead and got an Anbernic RG505 handheld and it's been perfect for old school gaming for me.

Yeah this is partially why I just use emulators too. It would be awesome to get the old consoles again, but I also feel like if I did do that than I'd want to get something in really good condition that I then wouldn't even want to use lol. Using emulators is just a lot more convenient for me and many others.

Then I guess you would partially consider. Recently I just finished Sims Bustin Out and The Urbz Sims in the City (typical overachiever) then the rest are Pokemon and Harvest Moon games. This is for the GB/GBA emulators.

As for other consoles like N64, Paper Mario I guess and Harvest Moon (again) Lol. And for the PPSSPP, once again Harvest Moon Hero Of Leaf Valley and a lot more. Hahahaha. ?

I'm planning on getting an Anbernic very soon or maybe something similar so I could play without consuming much power on my mobile devices.

I remember playing Sims Bustin Out when I was younger. Didn't stay interested in Sims games for too long, but they were fun while I was. Old Pokemon games are all kind of Ws honestly. Paper Mario, absolutely fantastic game and one I beat many times. I'd definitely play that again to this day. They have some newer ones I never played too so maybe I should look into that. Harvest Moon I'm familiar with, but never played.

I'm kinda fond of repeating games, finishing all achievements, dominating everything and all. As a matter of fact, I have been repeating games over and over the years and I never get tired of doing it to be honest even if I am an adult now. Lol. I am mostly fond of simulation games, so that's the reason why I like Sims, Harvest moon and anything that comes around. The graphics of GBA is so nostalgic and reminds me of happy childhood days including moments when I hide my gameboy from my parents before bedtime and play all night long.

You should try Harvest Moon, its fun. Actually if you know Stardew Valley, it was based from it. ?

I'm the same way with a handful of certain games. I can have beaten it 5 times over and multiple of those doing basically everything, but that wont stop me from having the itch to do it again a year or 2 later haha. Some games are just THAT good and or grab us THAT much. Another great thing about playing those old games like you mentioned is the nostalgia factor for sure. I imagine that's a big part of it for a lot of people and all the more so that are older nowadays. Nostalgia is quite a powerful thing after all haha.

There are definitely some newer games I can play through multiple times too, but I do feel like there are more of those kinds of games for me that came out a long time ago. Maybe it's just because it was a different time in gaming, when we were younger, and things of that nature. So they kind of stick with us more.

I definitely agree because old games from when we were young are the foundations of what we are now and why do we play modern games. I believe that the newer generation would just be like us. ?

Moookie - April 7, 2024, 12:13 am

Not so much anymore. I used to about 5 years ago, but so much has changed since then... I don't even play my up to date gaming systems, let alone my old ones. I think I might be phasing out of the whole video game thing... Idk. I do take long breaks from it at times, so may get back to playing later on in life when I find more time.

Absence - April 7, 2024, 12:42 am

Last week I booted up a few consoles to let my niece play

I was super excited thinking she was going to be into it as much as I was, haha, she wasn't.

She likes to play cutting edge games even if she isn't good at them, so I have a lot of hope for how much she will play later. I think she will be a geek, and that is amazing in itself!

Playing the GameCube was so fun but it felt completely different from when I used to play it. I

couldn't enjoy the nostalgia. I had more success playing GameBoy again, but even that was hard.

I did enjoy playing some Warcraft 3, but thats PC.

Yeah that makes sense logically I think. I'm sure there are lots of people in a newer generation that experienced many games in the last 5-10 years for instance and differently than us. Then down the road some of those games will be to them what some of these "old" games are to us now.

GTA 4 first released on PS3 and Xbox 360, yeah? Can probably be played on at least one of the newer systems too. You play anything on older systems than those or that you use emulators for maybe?
