Thread: [MrRazor has Disputed a Contract with neon_light \(4885155 \)](#)

MrRazor - January 30, 2024, 9:47 am

Contract Link: <https://hackforums.net/contracts.php?action=view&cid=382622>

Disputed Member: <https://hackforums.net/member.php?action=profile&uid=4885155>

Sales thread: <https://hackforums.net/showthread.php?tid=6224127>

What he should sell to me a (Desktop Application (Windows) Crypter:

What he provided:

He provided me only a API based upload fake (crypter), that encrypt the file on his server. Is not a crypter it self just a upload program.

I requested a desktop application crypter with scanner feature etc... and he also promise me to learn how the FUD the stub etc... In the end he is not keeping his promise and also he sold the crypter already to someone that request me to change directly crypter.

Contract Terms:

The deal is neon_light going create the desktop crypter and maintainece / updates.

We split the income 50/50 for future updates / development / stub updates to lower dedection.

All of our development is for education purpuse including sharing and selling the software for education purpuse.

Like 20 old customer can use the crypter lifetime.

neon_light will also help me and learn how to fud the stub on my own rdp env also sharing source code with me.

Deal price is \$500 in Litecoin Crypto.

Deadline from conv with him: I rather say two weeks and finish sooner than giving a sooner date and finishing later

He just added me also on his ignore list:

The crypt part to encrypt the file is just a upload and download to his server, encryptions are not inside of the program!

Amnesiac - January 30, 2024, 9:52 am

Very unprofessional. He came in the convo instead of addressing the dispute

(Jan 30, 2024 10:52 AM)Amnesiac Wrote: [\[CITE\]](#) Very unprofessional. He came in the convo instead of addressing the dispute
You are playing the role of the wise guy and giving advices while you can not pay my money back? This is shame.

StuffSneak - January 30, 2024, 10:54 am

Looks like [neon_light](#) is online right now.

Contract clearly states:

Quote:The deal is neon_light going create the desktop crypter and maintaine / updates.
& if what OP says is right & [neon_light](#) you simply just provided him a api site which should take couple of days (if not sooner), if you already have API then what you are selling is completely different than what you have advertised & mentioned on contract.

MrRazor - January 30, 2024, 10:59 am

He is not responding and placed me on his ignore list, and he just updated the contract feedback:

Ph4n70M Phr34K - January 31, 2024, 3:25 am

neon_light is a known scammer. Im surprised he even accepted your contract. Perhaps he didn't think you would actually check what you got.

neon_light was already banned for 6 months for scamming people offsite, i thought he ditched this account already.

Spoiler [\(Click to View\)](#)

Two years ago he took 50\$ from me and blocked instantly. No fucks given, no words given, he just took the scraps and instantly blocked everywhere :D

<https://hackforums.net/contracts.php?action=view&cid=323733>

Spoiler [\(Click to View\)](#)

Seems like he dont give a flying fuck about his account, just trying to scam as much as possible.

Hi Ph4n70M Phr34K,

That is why I PM'd you because I needed some advice. Also to verify the crypter is legit. In the end you put me on ignore list to ?

You made so awesome big thread about cryters etc.. really loved it!

He is not only taking now my money, he sold this stuff multiple times... not custom at all.

Thank for your reply,
Mr Razor

Ph4n70M Phr34K - January 31, 2024, 3:50 am

You have sent me a PM indicating that "I bought a own crypter from tid=6261188" + some broken sentences that i couldn't understand.

tid=6261188 is my own thread.

Then i looked at your website(razorhosting) that looks like a placeholder, not a hosting.

So i assumed you are just a troll.

I know it could be just your mistake, but still its only your responsibility.

Next time do your diligence, do your own research. It would take you 5 minutes to find out you are being deceived.

Why do you think so ?

neon_light - January 31, 2024, 10:37 am

A)
First of all, he confirmed with me via chat that the crypter works exactly as desired.

Here is my evidence: [HIS OWN SALES THREAD](#) trying to sell the crypter I created for him. I could end my response here.

B) I knew he was an idiot when he invited me into a group chat with one of his buddies and demanded that I talk to him.
So I talked to his buddy and showed him a DEMO OF THE CRYPTER and explained everything to that guy and even left some explanations in the group chat.

Then a few hours later he wanted me to show him a demo and explain everything to him in his own chat.
What the fuck was the point of this group chat then?
I left that group chat at that point and just sent him the crypter files to examine.

C) At that point this guy demanded me to change the licensing system from using the aegis licensing system (duh, why wouldn't I use my licensing system?) to create a custom licensing system for him on his own server.
I told him that he bought a crypter, not a licensing system, yet he kept demanding I create a custom solution, which I ended up doing to avoid a deal dispute.

(Jan 30, 2024 10:47 AM)MrRazor Wrote: [\[CITE\]](#) The crypt part to encrypt the file is just a upload and download to his server, encryptions are not inside of the program!

Of course its an API based crypter which does server-side crypting instead of client-side crypting, because its a million times better.

A client-side crypter (aka crypting on the customer PC) can be very easily cracked by removing the one line licensing check and hard coding the stub returned from the server.

Now you have a cracked crypter which can be used for free forever.

In contrast, if the crypting is done server side then its impossible to hardcode any response from the server and the crypter is literally uncrackable.

But you genius would rather open a deal dispute against me and earn 0\$ in sales instead of thanking me for creating such a perfect crypter. Genius.

(Jan 31, 2024 04:25 AM)Ph4n70M Phr34K Wrote: [\[CITE\]](#) neon_light is a known scammer. Im surprised he even accepted your contract. Perhaps he didn't think you would actually check what you got.

I will also ask staff to remove your claims as its libel.

A):

you never provided my a crypter with Stub etc... we agree on it is in the terms of our contract.
You will help me to fud my own STUB etc... on my RDP. Now it is a API crypter we never agree on!

B):

You pushed me to open a thread and you will fud it after it.
You never came back on how i fud my it myself.
On your request:

C):

Your sales thread never told it is a API based crypter. I didn't choose for a web crypter. Just a normal desktop crypter with stub etc...

And you are saying In contrast, if the crypting is done server side then its impossible to hardcode any response from the server and the crypter is literally uncrackable.

Crypting is done on a SERVER OF YOURS. You already sold your project. So it will be on other person his server.

And second you can't call this application anymore a crypter, because is no crypting be done in the application it self.

Also with your other buddy, you sold the same thing conflict, and didn't appraise it.
And deleting message, is very bad for this dispute.

His other cus:

With Do automatic cloud updates, AIR. you promises me it can update stub for each user. Only again you didn't keep you promise.

How can you explain this AIR update stuff... If the crypter don't receive any air update only is processed on your server.

So you going send me full code of your server to me, that would be the part it become a real crypter, not shitty api based crypter that take you to build more 2-3 weeks! simple code to post it to your server and returning it.

Ph4n70M Phr34K - January 31, 2024, 11:41 am

(Jan 31, 2024 11:37 AM)neon_light Wrote: [\[CITE\]](#) I dont even know who the fuck you are man. We dont have any contracts, so I never dealt with you.

You are such a pathological liar. The proofs are onsite.

- onsite HF contract, you just waited it to expire - (screenshot shown)
- onsite chat(convo) when i asked you what is going on, you added me to ignore list - (screenshot shown)
- shortly after you were banned for scamming people offsite - (screenshot shown)

You cant deny that you dumb-ass.

StuffSneak - January 31, 2024, 12:53 pm

(Jan 31, 2024 11:37 AM)neon_light Wrote: [\[CITE\]](#) snip

You are offering 2 options on your thread:

Web based (Online Crypter) or a Desktop Application (Windows)
& also say

Quote:I will also provide you with support and tips and tricks on how to FUD and keep the crypter fud.

The contract says:

Quote:The deal is neon_light going create the desktop crypter and maintaince / updates.
neon_light will also help me and learn how to fud the stub on my own rdp env also sharing source code with me.

You see the problem? Have you fulfilled everything you have promised & mentioned on contract?

If you only wanted to provide him a "working crypter" then you shouldn't have accepted that contract with those terms. Instead you should have sent a different contract with terms saying "I will provide a working crypter"

Ph4n70M Phr34K - January 31, 2024, 4:00 pm

What a find from an old friend

<https://hackforums.net/member.php?action=profile&uid=1656451>

<https://hackforums.net/showthread.php?tid=6055469>

Clearly the same guy and the same website. + couple of disputes as add-on.

Buddy is a known ban evading scammer, thats for sure.

Ouch

MrRazor - January 31, 2024, 9:06 pm

(Jan 31, 2024 12:10 PM)MrRazor Wrote: [\[CITE\]](#) With Do automatic cloud updates, AIR. you promises me it can update stub for each user. Only again you didn't keep you promise.

It can already do that, you idiot.

(Jan 31, 2024 12:10 PM)MrRazor Wrote: [\[CITE\]](#) How can you explain this AIR update stuff... If the crypter don't receive any air update only is processed on your server.

It doesn't have to be processed on my server you idiot. It would have been on your server.

And the air update is built-in automatically, you just needed to update the stub on the server and all the clients are automatically up to date once they crypt.

(Jan 31, 2024 12:10 PM)MrRazor Wrote: [\[CITE\]](#) So you going send me full code of your server to me, that would be the part it become a real crypter

I never said I wouldn't send you the source code for the server part, but you decided to open a dispute you dumbass. The crypting would have been done on your server, just like the licensing system is already on your server.

You kept asking me for more and more changes (changing the licensing system, changing the UI, changing the TOS, etc) and once I was done with the desktop crypter and you told me you were happy I sent you the source code.

Then like a true idiot you immediately threatened me with a deal dispute (third time at that point) because its a server-side crypter.

this is when I told you to go ahead and open a dispute if you dont like it. I am not going to let a dumbass like you threaten and bully me with a dispute and disrespect my work. More evidence of his disrespect:

(Jan 31, 2024 12:10 PM)MrRazor Wrote: [\[CITE\]](#) shitty api based crypter that take you to build more 2-3 weeks! simple code to post it to your server and returning it.

This "shitty" api based crypter is better than anything you have ever built or could build.

You couldn't even add your own TOS tab to the crypter and begged me to do it. So don't talk about my skills when you cant even move a fucking button to a project.

It would have been faster if you wouldn't have demanded me to create you a custom licensing system and asked me for 20 different changes in the crypter, and if you didn't waste my time with your useless group chat with your buddy.

(Jan 30, 2024 11:54 AM)StuffSneak Wrote: [\[CITE\]](#) Looks like [neon_light](#) is online right now.

& if what OP says is right & [neon_light](#) you simply just provided him a api site which should take couple of days (if not sooner), if you already have API then what you are selling is completely different than what you have advertised & mentioned on contract.

First I created the finished crypter and asked him if he is happy with everything, he told me yes he is happy.

That's when I started to prepare everything to send to him, first the desktop crypter source code (sent immediately), and then I got to work on fuding the stub. (Remember, this was agreed on and discussed with him)

At that point this idiot already threatened me with a dispute and then opened this deal dispute because he doesn't like that its server-side crypting and because he doesn't understand what the fuck he is doing.

I didn't even get to the part where i FUD the stub and then send the FUD source code for the stub because once again, this idiot already opened this dispute the moment I sent him the first source code.

StuffSneak - February 1, 2024, 1:04 am

Been talking with Nodes, and found out this.

His first version of the crypter

Is same from the banned user:

<https://hackforums.net/showthread.php?tid=6034061&highlight=codeprotector>

Conv about the interface with the screenshots.

And found out in the source code the main directory is codeprotector:

Hackers - February 2, 2024, 7:21 am

I am 100% convinced that neon_light, youlded - has1, and Eladictocosity are the same person. There may even be more accounts / crypter clones going around we can find.

I have sent all of the info on to staff. I think it's time for this guy to be closed. There is absolutely no

doubt in my mind that neon_light is re-skinning the same crypter over and over and scamming HF users for years.

I'd be happy to share screenshots if any staff want them. I can see the same exact UI / UX between the 3 accounts for the website, as well as the software he sent MrRazor. They're basically identical with some color swaps, but neon_light has a post where he tells everyone that Aegistools.pw was 100% custom coded from him. Which is probably true - it just means he custom coded it on an older HF account first, got banned, and came back as a multi.

MrRazor - February 2, 2024, 8:48 am

You're going to send me money back?

<https://blockchair.com/litecoin/address/ltc1q0rwy363thlcfkqh9p2jhchagva8p5rzuts05v>

I see you paid someone \$25. Can you send \$500 to my wallet!

It is your wallet, if you are going to lie about it again, the transaction hash is included in the contract:

You just clean your wallet. After my post. I will keep following the money. Including your USDT and other addy's.

Omniscient - February 2, 2024, 12:34 pm

[neon_light](#) you have 24 hours to RESOLVE this DISPUTE else it's BYE BYE.

Everyone is fairly sure you're this guy who was ultimately closed for EXCESSIVE DISPUTES.

<https://hackforums.net/member.php?action=profile&uid=93143>

So maybe, just maybe, stop being a CUNT and REFUND the very unsatisfied customer. Not gonna let you get more than this one Dispute. So resolve it NOW.

MrRazor - February 2, 2024, 12:59 pm

[neon_light](#) You can send it back to my original payment LTC address:

LZydS5NaxEFve9UTMCQEKBAMYS3YUKan9E

I see you are online now, hope to see my money back asap.

Still on your ignore list.

Hackers - February 3, 2024, 11:58 am

Here you can see that neon_light verifies that he coded 100% of AegisCrypt / his web services. And yet it seems his software is at the core of many contract disputes across a lot of closed accounts.

Also kinda weird that youlded has1 actually shows off the Aegis web UI many months before neon_light did:

<https://hackforums.net/showthread.php?tid=6054667>

This is also weird because we can see he bought part of the GUI theme from here:

Created Aug 2014 here - <https://hackforums.net/showthread.php?tid=4405519>

Also known as Code Protector:

Which according to MrRazor, is also found in the source code of what neon_light gave him too:

This was DATA ENCRYPTER EVO in Nov 2014 -

<https://hackforums.net/showthread.php?tid=4555905>

Before scarface ran EVO, it was ran by byte[] -

<https://hackforums.net/showthread.php?tid=3980649>

GUI also shared in Dec 2019 here: <https://hackforums.net/showthread.php?tid=6034061>

EveryCrypt is AegisCrypt, and is sold by ...

<https://hackforums.net/showthread.php?tid=6051726>

- I don't think TR is a multi of neon/youlded, but likely just sold the tool at one point in time.

Here's some similarities between exact flow for the recovery tool w/ the website to view logs:

In case you have doubts, here's another UI similarity, and if you go through all the thread links in this post of mine here, you'll see a lot more.

In this image you can see youlded has1 bumping TR's thread, almost as if he updated the wrong thread. Kind of weird for youlded to write an update like that. Both users had sales threads for EveryRecovery within same week of each other, but again - seems like Dropper was just selling software on behalf of neon / youlded.

1stetcgoldmedal vouches for Youlded has1:

eldoxcosy - February 3, 2024, 7:41 pm

Eladictocosy here <https://hackforums.net/member.php?action=profile&uid=93143>

left hf forever but i was contacted by someone to clear my name out of this so here i am had to fucking use vps and shit to access here and post all this

i am in no fucking way associated with neon_light or whatever crap that shithead is doing these days

-i was an oldskool 2009 hf user and throughout my hf journey i interacted with and worked with many different coders here with just few to name include

DeMoni - n0\$3ratu\$ - neon_light - marvid - Paskowsky - and some others

-This was coded in partnership with marvid

www.hackforums.net/member.php?action=profile&uid=3114960

<https://hackforums.net/showthread.php?tid=5373696&pid=52105980#pid52105980>

-Code protector in start was coded by Paskowsky

our contract - www.hackforums.net/contracts.php?action=view&cid=106739

www.hackforums.net/member.php?action=profile&uid=3609589

old image of code protector that was coded by Paskowsky

i.postimg.cc/fb3F0Gwp/oldcodd.jpg

Code protector was running smooth until Paskowsky left me a pm saying he cannot work for me anymore.

Now i had to find another coder who could keep code protector crypter online for me and for my code protector customers. At this point, i found neon_light after stumbling upon at one of his coding threads.

so i then paid him to release new version of code protector and get it online so i can continue running code protector crypter

Contract between me and neon_light

www.hackforums.net/contracts.php?action=view&cid=256521

so he continued working for me up until a point where he became greedy too much and asked me to split code protector profits 50/50 with him and when i did not agree to this (i used to pay him per refud/update prior to this greed) he disabled code protector crypter servers that were on his own hosting something and our partnership broken and i had no other option but to dump code protector

now i see he coded some crypter for like 2 or 3 people and he just copy pasted code protector and handed them over

that is not on me to blame and i stopped all communications with neon_light the day when he disabled code protector from his side and literally scammed me because i paid for that project it was mine not his but he disabled it and scammed me

now it comes to my attention that he is just copy pasting the code protector crypter which he coded for me he is just copy pasting and selling it like wild to random people

Don't fucking associate me or my code protector crypter with scams of neon_light that shithead bastard is greedy as fox

all the talk i did above, i posted proofs with it. Further it can be also verified through my Eladictocsy account i am willing to even give my Eladictocsy account password and 2fa to staff and they will be able to see all the dm's from neon_light and other coders they are still in there in my message inbox

The "10" disputes that are open on me, 9 are related to code protector crypter because of coders mistake and laziness neon_light often used to disable code protector from his side severs and then customers fucked me with disputes. Remaining "1" dispute by iwon on me i could not find chance to fix that because idk why i before that dispute i was banned from hf with no reason given and i tried to get in touch with iwon but to no avail

that was all i had to say i have no business anymore on hf so i will now peace out

i wish everyone the best of luck in fixing their conflicts

not neon_light

Thanks for all of this info. In my post I did think you were a multi of neon, but now that you've shared this info it seems that it's more likely that neon is lying to customers (not a CUSTOM crypter, it's a re-skinned crypter) and unable to fulfill promises (/ scamming) than it is that he's been the person selling this from the start. I had a feeling, but couldn't be 100% sure on who's a multi versus who's a seller, versus who did neon rip off.

Thanks for adding to this "story", I think it's about time the truth of AegisTools is brought to the surface.

mymy - February 5, 2024, 4:48 am

Please I want to learn hacking [warn]

Hackers - February 5, 2024, 5:23 am

Just putting this here so everything is in one place -

<https://hackforums.net/showthread.php?tid=6262966>

In this thread you can see that neon_light sold the exclusive, full rights to Zach Farlow in November 2023, but neon has continued to sell copies of Aegis. This may mean that Zach has a valid dispute against neon because it's infringing on Zach's full ownership of Aegis software at best, and at worst it could be that Zach is just another multi of neon. The Aegis software seems to mysteriously change owners every f'n time there's an exit scam. I posted the linked thread to hopefully stop this cycle of scamming and get Aegis thrown out of the marketplace once and for all.

Klonopin - February 7, 2024, 11:11 am

(Jan 31, 2024 11:37 AM)neon_light Wrote: [\[CITE\]](#) In contrast, if the crypting is done server side then its impossible to hardcode any response from the server and the crypter is literally uncrackable.

Not true, knowing your application was in vb.net. you could easily exploit the API endpoint. i wouldn't be surprised if the API endpoint was littered in vulns, knowing you used vb.net and a free theme skin to build your application.

Hackers - February 7, 2024, 9:22 pm

Going to add this here too... found more versions of this software being sold many years ago.

(Feb 2, 2024 01:34 PM)Omniscient Wrote: [\[CITE\]](#) [neon_light](#) you have 24 hours to RESOLVE this DISPUTE else it's BYE BYE.

Everyone is fairly sure you're this guy who was ultimately closed for EXCESSIVE DISPUTES.

<https://hackforums.net/member.php?action=profile&uid=93143>

So maybe, just maybe, stop being a CUNT and REFUND the very unsatisfied customer. Not gonna let you get more than this one Dispute. So resolve it NOW.

Hi Omniscient,

I wanted to update you on the situation with [neon_light](#) scammer! Unfortunately, he hasn't been active on HackForums anymore. Instead, he's shifted to Discord, where he's actively blocking direct accounts. Despite discovering his other Discord handle because he love to play Roblox etc., when confronted, he responded aggressively, telling me to back off.

What's frustrating is that he's still not banned or removed from HackForums. He hasn't refunded my money, and there are others in the same boat.

I'm now eager to learn how to better protect myself in the future. I utilized HackForum's contract system, filled in all the necessary details, yet still fell victim to this scammer. It's not just about the \$500+ I lost; collectively, he's scammed people out of \$3000 to \$4000+ in total in just two months.

Maybe idea if a dispute / contract is active the user will not have the right to place you on his ignore list.

Backing this up ~ [neon_light](#) and [TomerGamerTV](#) have the same sibkey in Keybase.io showing same encryption signature on a Windows device.

MrRazor also showed me the logs of a german IP (Neon) re-accessing the VPS.

I've talked to TR/Dropper.Gen5 and believe him, but he was a past seller of AegisRecovery / EveryRecovery and used a Germany based DC for his hosting here:

Here is another "coincidence"... This RazorCrypt (NOT MrRazor, original RazorSoft). He is also in Germany and has a lookalike crypter:

These don't 100% match and this could just be another crypter using same GUIs... but to also be from Germany? Sus.

~~~

why are all the "suspects" using the same GUI, from Germany, full of disputes, and selling software that has been resold for 10 years?

Is that really a coincidence? I don't think so.

TR/Dropper.Gen5 - I think you were probably sharing screens / thread design given to you by someone else possibly. Sorry for throwing your name out there again, but I had to mention this.

**Omniscient** - *February 11, 2024, 9:58 am*

Scammer is now closed. I'm sorry it took some extra days but I wasn't on my main desktop computer for the past week while I was renovating my office.
