which one did you enjoy playing the most?

PS3 was my last console, and the peak of FPS games. Never got a PS4 or PS5. I switched to PC.

PS3 for sure, Call of Duty Black Ops / Skyrim

I played a lot on PS4 for Destiny,

Never bought PS5 tho, don't have enough time anymore for video games

I haven't had a chance to play on a Playstation 5 yet but I do think the new controller looks great and so does the UI, can't speak on actual playing though. I have some fond memories of MW2 on the PS3 but I would have to say I enjoyed the PS4 the most.

I'm not a console fanatic, I definitely prefer PC more.
To enthusiasts I don't have to explain why ?

Some of the best games ever came out on the PS3, IMO.

PS3 for sure, so many good games I played on that.

Why is PS2 not in the list? Haha, in all seriousness, PS4 was probably my favorite out of those three. The graphics upgrade from PS3 was pretty substantial with games like Uncharted 4.

But if PS2 was in the mix, definitely picking PS2. The game selection on that console was insane.
