Thread: [Instagram, Facebook, Whatsapp and Twitter Hacking Method](#)

whits - February 1, 2024, 4:21 pm

This will be processed into your localhost, your apache2 server, but before that, use kali linux and say service start apache2 before doing these.

First of all, we need to download settoolkit, if there is one, we need to call settoolkit and run it.

GitHub - TrustedSec/social-engineer-toolkit: TrustedSec's Social Engineer Toolset (SET) repository

- All new versions of SET will be distributed here. Then you will see a screen like this:

Welcome to the Social Engineer Toolkit (SET).

Your one-stop shop for all your social engineering needs.. From the menu choose:

exit set > 2

connection toggle settings in set_config if too slow/fast.

Multiple Attack method, web attack

will add a combination of attacks via its menu.

For example, try the Java Applet, Metasploit Scanner, Credential Harvester/Tabnabbing, and Man Left in the Middle attack to see which one is successful.

you can use at the same time.

- 1) Java Applet Attack Method
- 2) Metasploit Browser Exploit Method
- 3) Credential Harvester Attack Method
- 4) Tabnabbing Attack Method
- 5) Man in the Middle Attack Method
- 6) Web Jacking Attack Method
- 7) Multiple Attack Web Method
- 8) Generate or import CodeSigning Certificate

99) Return to Main Menu

set:webattack > 3

We say 3 and continue again, then only one more thing will appear.

[-] Email harvester authenticates using cloning capabilities in SET [-]

information or parameters of a website Aleykum Salam good Aleykum Salam place them in a report

[-] SET supports both HTTP and HTTPS

[-] Example: Work at Home FAQ™Example

set:webattack > Enter the URL to be cloned: facebook.com you can write here (You can use other sites. For example: instagram.com or twitter.com or whatsapp.com)

[*] Cloning the website: Bei Facebook anmelden

[*] This may take some time...

The best way to use this attack is if the username and password form fields are available. Regardless, this captures all POSTs on a website.

[*]I read the message above. [*]

Press {return} to continue.
