Anyone here fans of trance music?

If so, who's your favorite artist?

Cosmic Gate

Above & Beyond

Few others of course, but I search these weekly :P

Ah... Above & Beyond... one of my favorites too.

Pretty much anything on the Anjuna labels (deep or beats) I'm down with.

Someone create a time machine so I can go back to the 90s/early 2000s and pop some mollies. I only got to experience this godly era of music as a child.

Thanks for Cosmic Gate recommendation. I only started listening to Trance music recently as I play it while I'm working in my workshop since it's nice to listen to anything that can get me going but it can't be music with too many words as then I'm too focused on these words and get distracted. Wow that's a really long sentence. I hope it's not bad to dig out an older thread but I typed „trance” in the search box and this was one of 2 threads that popped out. I'll think about creating my own thread.
