Thread: [Huawei Honor 10 Lite](#)

ChiyoMihama - February 2, 2024, 9:06 pm

Hi guys, this is my first post here •?•

Anyone knows how to unlock a Huawei Honor 10 Lite?

i have that phone and i want to know if any of you guys know how to unlock it or something.

I'm not gonna lie, the phone isn't mine, but, don't think wrong, the original owner gave this phone to a familiar and now i have it, i first thought to give like the full explanation of why this guy give to my familiar the phone but idk maybe that's the kinda details that count as "personal information" (srry im new in this kinda cool hacker forums hahaha)

Anyway if i don't know how to unlock it, it will be just sitting in my room forever, idk what to do with it, and tbh i thought that it could be a nice opportunity to learn how to do that kinda of stuff and good material to make my first post here.

thx for reading me :3

you can easily wipe it using the buttons "hard reset" then you will need someone that does frp unlock on one of theses phones

If its locked to a particular network then there's sites that claim to offer unlocking codes for different phones but its a risk.
