Thread: [Dump BTC ? Is 12k coming?](#)

Chapman - February 3, 2024, 9:04 am

I am expecting a major dump of BTC before it's all time high. I am expecting 12k...? What's your thoughts?

Vitaly - February 3, 2024, 9:08 am

what catalyst do you think is going to happen to drive price to \$12k at this point?

G Eazy - February 3, 2024, 9:56 am

Not going to happen.

GruntStyl - February 3, 2024, 11:45 am

Unless a pandemic or something major like that hits, I don't think we see anything lower than a \$18-20k BTC again. That's with awful news coming out or Elon musk himself says crypto is lame. lol.

You'd have so many people investing at low prices like that I just don't see it happening. Although I've been wrong before. I just wouldn't bet on it.

Popular - February 3, 2024, 11:49 am

No I highly doubt this.

illuminati? - February 3, 2024, 1:16 pm

I don't see it happening.

But, with that being said, anything is possible.

Maskin - February 3, 2024, 3:21 pm

Bad news for BTC is coming. The external 7b-9b in the chainstate will collapse. Transactions will be frozen and yoghurt for everyone.

SIM-1866423 - February 4, 2024, 12:22 am

I got orders around 12\$ hope it hits this time

abdelx95 - February 4, 2024, 11:48 am

What do you mean?

What's happening??

Don't sell your Bitcoin my friend.

SIM-4716193 - February 4, 2024, 10:53 pm

Everytime there is a slight downward trend in BTC, people just go bonkers.

Everything is finished, yay, let's buy at dirt cheap then wait for it to reach 100000.

Same happened during the Ukraine conflict, FTX saga & what not.

Imo let's just wait, chill and see what the market is doing.

Chapman - February 5, 2024, 4:48 am

I am seeing 36400 soon!

bigbronlet - February 5, 2024, 10:38 am

(Feb 5, 2024 11:38 AM)bigbronlet Wrote: [\[CITE\]](#) wait, what?

Nothing. Not sure what this thread is about directly. No bad news surrounding BTC has come out from what I've seen, unless I've missed something. The market has pulled back slightly. But nothing abnormal.

anoncrab - February 5, 2024, 11:33 pm

I don't think bitcoin price will drop until the mass cyber pandemic that the World Economic Forum is planning happens right before the next Presidential Election. When whatever event before the election happens, my guess is the bitcoin price will drop to like \$10k. So like November Bitcoin will drop massively would be my guess.

what a dangerous assumption but it could be, my thought is that its gonna drop a little bit like 25-30k if it goes lower its going to be a summer ultra black friday sale haha

Eran - February 6, 2024, 3:54 am

Not going to happen lol.

Chapman - February 6, 2024, 5:29 am

Yes, definitely it will be a great time to buy in spot.

an4l 1st - February 6, 2024, 5:51 am

I really hope btc goes down to 12k... everybody wishes that to happen so they could buy... that is why it is not going to happen...

it it just like that person you wish so much... it is never gonna happen... this person is busy looking at me..

and all I can do is just to look back... with that look: sorry... you arrived too late

Wow, you went really deep there. I'm sorry you're hurting. She isn't worth it, bro <3 lol good song tho, haven't heard that one in probably 10-15 years.

Charlie Sheen - February 6, 2024, 6:50 am

For predictions you should have logic, articles of pending actions, or at the bare minimum screenshots of trends. Don't just show up with "It's going to 12k, I can feel it."

I can't see it ever see it going that low again, it hasn't been that low since before the 2021 bull run.

DashPHP - February 6, 2024, 6:53 am

With halving coming up, that could kill BTC. Doubt it will happen.

MarkGold - February 11, 2024, 4:35 am

i also do believe that it will hit 15-12k soon before ATH

Omniscient - February 11, 2024, 9:17 am

I personally don't see how 2 months from the Halvening we'll see a drop below \$30k. I actually expect to see \$60k+ by the event. With pullback afterwards that might be at the current levels in the \$40k range. If we didn't touch \$12k in the past 2 years, we're never going to see it again. The lowest price in the past 2 years was \$15k. The last time BTC was \$12k was nearly 4 years ago (Oct 2020).

The chances it pulls back to a price from 4 years ago is incredibly low. Bitcoin price action has never done that. It's not gonna start now with a new change in behavior. People think Bitcoin doesn't have cycles and that it's random. Not really true. The cycles are based on the Halvening event. You can chart it yourself to see exactly how the market behaves to the event.

I'm expecting \$420k peak within 18-24 months.

you actually believe this nonsense?

Professional27 - February 11, 2024, 10:48 am

Let's not forget that the Bitcoin price has already dumped roughly 76% since its all-time high. It is more realistic to prepare for a dip to the \$31.5k area. In the extreme scenario of a world event, maybe a drop to the \$ 20k-ish area.

Noble - February 11, 2024, 3:32 pm

Individuals who think price is going to take off where it's currently at right now is in for a rude awakening
