Thread: [Website Cloning](#)

3oxic - February 5, 2024, 6:51 am

So I have seen a game made in html + js + css. Went right clicking to inspect element and i cannot. Then the next most obvious thing to do:

Hit CTRL + SHIFT + I

Inspect element opens but nothing usefull so far. Tried to download with HTTPTrack and failed.

First off how is even such thing possible?

i guess HTTPTrack immitates a browser through headers maybe, so that shouldnt happen?

I see the game does multiple post requests to an endpoint, and fetches some picutres from various endpoints.

Is it possible such thing to be cloned? If yes how?

TheSign - February 5, 2024, 2:37 pm

You won't be able to clone completely, maybe some elements, but the functionality itself will never

stdio - February 5, 2024, 11:40 pm

Share snaps of UI with chatGPT and ask for html CSS ;)

I don't think thats a good solution. I want an exact clone of the game which due to copyrights i guess chatGPT wont be able to give me solution

Hi,

Cloning a website via the user interface is like reverse-engineering a Bugatti from a photo. It'll look similar but it probably won't run the same ?

Try to see if the thing has a public git repository somewhere. Afterwhich you just do git clone <https://git.whatever.com/user/repo>

Get Git for windows here: <https://git-scm.com/download/win>

Cheers!

I could possibly help, what is the url you're trying to clone?

TechTerrier - February 8, 2024, 4:26 am

there should be a git repository you can clone, i dont see the possibility of cloning just the UI and it works perfectly.

Are you a retard, worried about copyrights with chatGPT yet trying to 100% clone a website.

Jam1e - February 16, 2024, 9:01 am

When you say you go to view the source you can't, do you mean the website blocks your access to its source code?

If so, in the URL bar, try something like view-source:website-url. That'll bypass any JS that may be preventing you from doing so.

Depending on the sort of site you're wanting to clone, I wouldn't be surprised if you don't find what you're looking for.

Are you though? I want to copy the game anyway no matter what the copyright is, i'm not worried about the copyrights. The thing is I CANT USE chatGPT because IT DOES NOT GIVE ME ANSWER due to their policy.

Think again now, are you the one who's retarded?

you need to use the right prompt or try evil dan on chatgpt.

Anyways did not mean to offend you by calling you retarded!

So you're saying you know how to unblock chatgpt or what?

stdio - February 25, 2024, 9:55 pm

I gave you the specific term you just need to google evil dan chatgpt bypass, or just chatgpt bypass. I didn't break it, someone did and posted on github.
