Thread: [Jail Ministry movie crack for jp6 8.3.1](#)

Tabletmovieguy - February 8, 2024, 12:02 pm

Anyone know a workaround since they updated the podcast and changed the dates?

Deen17833 - April 1, 2024, 1:24 pm

New work around and movie hack now available!!!

@ubis_command t-gram

Movie hack for jp6 tablets

On target tablet erase all movies from media store list

Restart tablet and wait a few minutes to let it scan tablet

While your waiting, on a broke tablet rename the desired movies after the ones downloaded to the tablet for instance

ReEntry101Ep1.mp4

This Ep list goes in order

1,2,3,4,6,7,8,9,10,17,19,18,20,11,12,13,14,15,16

After you've changed your desired movies

On target tablet go into settings

Under the second storage bar you'll notice a space at the end, this is and invisible eject button.

Press the button to eject the drive

Wait a few seconds for it to display 'ejected'

After ejected plug in broke to target tablet using otg cable

in esfile click on the USB drive in local tab and grant permission

Press invisible button again to mount disc and confirm

Wait 10 to 20 sec

In esfile copy your renamed movies and dropped them into the target tablets PVS folder

Let it finish transferring

In esfile Eject the target tablet and then unplug otg cable

Wait 2 to 5 min before opening your media store and playing the movies

Plz if anyone has the info on how to get all jpay apps to function properly let me know? Hope this

info helps some people and plz share the knowledge and don't be greedy

Does this work for the 8.16.0 / O11019 build?
