Thread: [Browser Extensions for Privacy.](#)

ShinThai - February 8, 2024, 11:46 pm

Hey everyone, hope you all are doing well and having a great day and week so far.

I wanna share some browser extensions which are really helpful for privacy. Now don't think by using these extensions you are 100% safe. Stay always aware and alert whatever you do online.

Below is a list which I have made by my own research and sorry because I was trying to share the image with everyone but it says until I make more than 50 posts I can't share any links, images or videos. So sorry for that.

(Remember: I'm not the smartest one but I learn everyday and try to improve as a whole + All kinds of suggestions are welcomed, so feel free to share your thoughts.)

CanvasBlocker
Chameleon
Cookie AutoDelete
Decentraleyes
Disable WebRTC
Ghostery Tracker & Ad Blocker - Privacy AdBlock
Google Analytics Blocker
IDN Safe
LocalCDN
NoScript
Privacy Badger
Privacy Settings
Random USe-Agent (Switcher)
Self-Destructing Cookies
uBlock Origin

Quote:One more thing I'm new here. I'm basically interested in topics related to but not limited to Hacking Stuff (Includes everything like different kinds of OS, Tools, Popular Trends, RAT, Web Application, etc.) Cryptocurrency, Politics, and Conspiracy Theories.

I like to learn and improve my self on a daily basis. I'll be sharing content by which we all can learn and improve together as a community. Looking forward to gain enormous knowledge.

ShinThai !

Hello, welcome to HF

You should use <https://imgur.com/> to host your images

Don't forget to read the [Help Docs](#) too !

ShinThai - February 9, 2024, 12:58 am

Thanks for the warm welcome first of all.

Yeah got your point.
Looking forward to meet knowledgeable people here.

I'd also recommend LibRedirect, it redirects a lot of popular websites to alternative and privacy friendly frontends.
