Thread: [if you had an e-commerce which hacking technique would you use to show your advertisi](#)

Cicci - February 9, 2024, 5:34 am

If you know any Kali tools or a method let me know.

DramaKing - February 9, 2024, 6:32 am

I'd probably use marketing techniques. Hacking wouldn't have anything to do with it.

if you insert your advertisement into a news site like hacking and pass it off as normal advertising you don't pay much money to do it. This would be an example I just don't know how to do it ?

So you're asking how to insert ads into sites using web defacement?

It can be done, but web defacement is much harder today than it was in the old days.

Nothing to say except Reconnaissance => Scanning => Gaining Access => Maintaining Access => Covering Tracks. Hacking isn't "Do this, and you're in." It's finding that one chink that a developer or blue team didn't secure properly.
