Thread: [Coding/Programming Services - Scrapers,Bots,Custom Telegram Tools & More - Affordable](#)

Wolfblack - February 16, 2024, 10:20 pm

Hello,

I run a coding service in the forums.. I'm a python programmer with 3+ years of experience in building professional and scalable programs/scripts which will make your workflow more easier.

I will try to understand the project details and any questions/queries you might have and provide efficient solutions.

I will complete the work in less number of days based on the complexity of the task.

Proxy features and captcha solving can be done along with more custom features, functions. Kindly write more details about the task/work in DM and I will quote a price and timeframe swiftly.

I have attached my contact details below! Thanks for reading!

Yours sincerely,

Wolfblack

Interested. Sent request on disc.

edit* - Just want to discuss what needs to be done over disc. I would like to do the deal (if we both agree) thru hf with a middleman.

conboslice on disc.

Vouch for the high quality program, he efficiently coded me a bot for blockchain scraping. Spent the time to fix bugs that came after many tests, and made a really cool program.

Mooooookie - April 2, 2024, 11:34 pm

I want to leave a vouch for Wolfblack. Not only for his coding service, but him as professional. I paid him to automate something for me in Python. While the job was small, I was impressed with his TAT on the job.

He was not only courteous but very patient, and knowledgeable in the things we discussed. I ran into some issues with when running the bot, unrelated to his coding, and he patiently worked with me thru the issue until it was resolved.

I definitely would recommend Wolfblack if you needed something coded, and wouldn't hesitate to use his services again myself in the future.

Divinity - April 23, 2024, 2:52 am

I can not recommend this user.

I was giving him a task for 3hours. User took above 24hours just to not deliver it at all. Very disappointed. Just faced errors after errors and couldnt fix it and kept asking me for stuff instead of doing the task.

Timewaster.

Wolfblack - September 9, 2024, 1:42 pm

online and working right now! kindly write down the program requirements in reply or DM!

pepperpeppow - October 2, 2024, 1:34 pm

Hired him for a project, he did good. I payed and he deliverd the files that I needed. When he was ready to show a demo, I was not available to attend the demo, this due time difference. Only feedback that I have is, if you need more time just say it. Most of us will understand. I will difinitelly hire him in the future.
