Thread: [Where are all the tor markets ?](#)

The Masked Pear - February 19, 2024, 11:24 am

Hi everyone !

Back 5 years ago, there were a bunch of markets all over the darweb.

Nowadays, i can't even find one alive.

Incognito seems still there but even right after registration, it's impossible to login (invalid credentials).

My question is: Does Tor is still safe? What happened to all these markets? And the most important: Why these dead markets are not replaced ??

Thank you all !

Jamika - February 19, 2024, 11:48 am

If u r taking about simple processes then yes, but deep you will probably get harmed by a way or another, also scam is raising each day

I talk about the fact that all markets are dead no others come to replace those.

Hmm world market in march last year exit scammed etc.. Seems like there is only one or two ..seems like tor is not anymore an option to find long lasting market services. You should use dark.fail url to find markets and links , be safe a lot of people were scammed over that links. Use tor please

?nxy - February 19, 2024, 7:35 pm

dark.fail

We need a new market....!

Markets go down for 3 reasons

1. They exit scam their users
2. They get seized and shut down
3. They retire to avoid the above
