Thread: [A simple explanation of how to bypass Windows Defender using Python](#)

venom5iix - February 19, 2024, 12:37 pm

Hello, I am simply writing the script for people who are curious to know how to bypass Windows Defender. Here I wanted to explain this code. How can you simply bypass Windows Defender and download the file?

contacte me [deleted]

note:I can't post the link as I'm new here): [warn]

You can post the code here within code tags. Forums are for discussion, not luring people to sketchy third party platforms.

Please familiarize yourself with [Help Docs](#)

You cant link your contacts, this is just to protect you and other members.

You can use tags to post the code or just link to your github or text-paste sites. But you cant include offsite contacts ie telegram, discord and others.
