Thread: [Contract #384900 Dispute has been Resolved](#)

White_Inky - February 20, 2024, 5:49 am

Contract Link: <https://hackforums.net/contracts.php?action=view&cid=384900>

Disputed Member: <https://hackforums.net/member.php?action=profile&uid=2365797>

The seller refers to images of a program that will never be given to the end user, after the purchase for a Life time at a discounted price he asked me to send the server to be encrypted.

in the Thread it is not specified that it is an encryption service for your files, highlighting images of a program that will never be delivered to the buye

Hackers - February 20, 2024, 5:58 am

His sales thread doesn't have any notes about it being a crypting service. It looks like he's selling a crypter software.

Bigbronlet has me on ignore for asking him questions in past, so I can't look at the latest thread if he has updated it.

He is telling OP that it's a crypt service, not a crypter software... but

He even calls it a PRODUCT - Not a service - in his TOS:

Bigbronboy, I know you are trying to use OP's English as a reason maybe he misunderstood, but maybe you shouldn't call your software a product if you want to be a service. The bad English is yours bigbron, and you should resolve this dispute unless you are a scammer

I have suspicions about bigbronlet.

Bigbronlet sent me a screenshot of his pm with now closed scammer [neon_light](#) here. It shows that S Protect is just another copy of aegis basically:

And yet on Feb 12 he straight up lied to me and said it's unrelated, he has no connection to him, and he'll never sell a crypter. He sent all this when I was asking him to prove that he actually had a real crypto transaction with neon. I asked this because I think bigbronlet IS [neon_light](#), or his business partner. I think bigbronlet got flustered and didn't mean to send me the first screenshot above because it contradicts his msg to me here:

In bigbronlet's thread he clearly shows pictures of a crypter GUI. The thread is advertising itself as a crypter because it shows the GUI of the crypter multiple times, but he is telling OP / White_Inky that

it's a crypting service, not a crypter software now.

you can see here that bigbronlet is part of a vouch circle with @SIM-2362485@ , going back years - and there are plenty of examples of him on Royal !, Elad, etc threads vouching for their crypters years ago too.

Here are a ton of other vouches from bigbronlet to Royal / neon_light / etc :

<https://imgur.com/a/b5E70gW>

Good luck OP, if I have time I'll dig through my screenshots and see if I forgot to upload anything. However, you can also find where I put the original info about bigbronlet in this thread too:

<https://hackforums.net/showthread.php?tid=6263240>

which is related to this whole aegis scam:

<https://hackforums.net/showthread.php?tid=6262442>

<https://hackforums.net/showthread.php?tid=6262966>

probably using an older GUI for this:

Sorry for your loss OP.

I'm genuinely hoping that you are the last victim of BaitCrypter aka Royal / Eladictocsy / gangushbo / neon_light / bigbronlet / SIM-2362145 / perhaps many more accounts. There is no doubt that this is one and the same scammer.

bigbronlet - February 20, 2024, 6:54 am

You opened dispute for what?. It is posted in my thread title it says "Private Crypt"

Not crypter?

Prices are also posted of single crypt, two crypts, and lifetime crypt?

Even still if you simply do not require the crypt service i refund your payment not a problem

send me your ltc address for refund if you like that

Hackers - February 20, 2024, 7:11 am

(Feb 20, 2024 07:54 AM)bigbronlet Wrote: [\[CITE\]](#) You opened dispute for what?. It is posted in my thread title it says "Private Crypt"

Where does it say that you are offering crypting as a service? Your entire thread shows the GUI, talks about it being a PRODUCT, and you say you are selling Swift Protect.

Also, you have me on ignore so you might've missed where I shared that. It's good that you are offering a refund considering you cannot deliver this product to the buyer.

White_Inky - February 20, 2024, 8:28 am

I recently bought bytecrypter from [SIM-2362145](#) and when there was licensing issue he sent me to Aegistools.pw website. It sounds like [neon_light](#) also built S Protect for [bigbronlet](#) and now I feel like I am being scammed by Aegis crypter creator twice

bigbronlet - February 20, 2024, 8:42 am

i am not in relation with any other crypter seller or creator by any means

you paid me for private crypt i was ready to provide that as i am selling swift from 2016

but you straight up opened dispute on me?

and now as i am trying to refund you since as per your words you do not want the "Private Crypt" service you are harassing me with fake blames?

Either you will have to take the refund or take the service from me, else this dispute is no longer valid and i will report this to staff.

Ph4n70M Phr34K - February 20, 2024, 8:48 am

(Feb 20, 2024 09:28 AM)White_Inky Wrote: [\[CITE\]](#) -

Good thing you posted this evidence. It will be added to all other proofs.

You should take the refund and close this dispute. This scammer will be investigated anyway, just a matter of time till he gets closed on this account. Its just too much onsite proofs on top of yours.

Hackers - February 20, 2024, 8:48 am

Your thread is pretty clearly centered around selling a crypter PRODUCT. If it's selling a service, that's very unclear and since you ignored me I can't check. AFAIK, you are selling a crypter product and have not delivered that. Perhaps you think differently, but your thread is full of references to you selling a crypter product....

I think OP is right to bring up Bytecrypter because you literally admit S Protect is Aegis in the screenshots you sent me here - and OP recently bought ByteCrypter which is also on Aegis. Coincidence? I think not.

For the record, I think bigbronlet is neon_light, or in business w/ him. Called this out weeks ago and have been waiting for a dispute on bigbronlet since that point in time. In my mind there is no doubt that the following screenshots are an attempt by bigbronlet to "trick" me into thinking he's not neon - I still think he is, but if he's not , then at least we know it's the same ol' aegis BS being sold time and time again.

You also confirm it again to me here:

bigbronlet - February 20, 2024, 8:55 am

You also confirm it again to me here:

S-Protect was coded for me by neon_light just as he coded for user MrRazor, i have full purchase contract with him right on my profile, as well as payment i made to him and i am willing to share

payment proofs with staff in case i am asked for those.

Apart from that i have no relation with neon_light or any other seller

back on topic op purchased private crypt from me and op denied taking service from me so i am offering refund i did not drag it anywhere

You only have active contracts and fake vouches between accounts that are already closed

Only advertising the same fake graphical interface

Only using the same licensing system, nobody else does that, only the scammers

Only pasting the same fake vouch posts.

"No relation" mhmm

bigbronlet - February 20, 2024, 9:10 am

what the hell are you talking about?

here is my purchase contract with neon_light

<https://hackforums.net/contracts.php?action=view&cid=380144>

linked thread <https://hackforums.net/showthread.php?tid=6224127>

and i payment proofs can be validated by staff if they check the btc address on that contract

and i am not selling any product with any aegis license shit? where do i sell anything with aegis?

my swift crypt is there from 2016 and never used aegis license crap?

hahaha wow man wow i must say the amount of drama on this thread is insane ooof!

hahaha wow man wow i must say the amount of drama on this thread is insane ooof!

How is swift crypt from 2016 but I've now posted twice that you admit S Protect, which is literally the software in your crypt thread, was made by neon_light just weeks/months ago? #confusing

Thank you for confirming that your crypter is not using aegis licensing. It means that when you talk about neon_light giving you a duplicated crypter, we're not talking about mere licensing, we're talking about the source code of a crypter. This is important because whitelabel licensing is probably allowed, but since you confirmed here that this is not what you meant, we can assume that S Protect is yet another GUI-makeover like suspected.

Also this is now the 4th time you've mentioned (to me or others) the contract with neon_light...

But every time you say a staff must confirm it. You know what I think? I think you never made a transaction / have no hash from your wallet or to neon_light's. If I'm wrong then as you say, staff can confirm it, but I just have a wild guess that your contract contains no TX hash and there is no actual evidence of that. Maybe I'm wrong but if you had a TX hash I think you would just share it and not

hide behind a private contract every time it's brought up

Fake graphical interface?. So you say hundreds of customers who used bytencrypter from around 2011 till now they were just playing with fake graphical interface?. You are funny.

Why would I change the version or change the way how bytencrypter works?. I have bought selling rights to an already perfectly working product so why would I bother to change anything on the crypter?. I have just bought the rights to officially sell it and maintain it, simple.

ByteCrypter coder is still with me on jabber and he was a member here on HF in past i can verify this for staff if staff ask me. I can link his profile to staff. But not answerable to you dear.

You and your buddies can both wine as much as you want but you are just talking in thin air.
Nothing more dear.
