delay

TrDropper, [22/02/2024 01:35]

for

TrDropper, [22/02/2024 01:35]

other av's

TrDropper, [22/02/2024 01:35]

tomorrow i will set

TrDropper, [22/02/2024 01:35]

delay

TrDropper, [22/02/2024 01:35]

;))

the runtime was not good but fine for me , that bypass WD so i just ask if i can have better result and next day @TrDropper scan the file on virustotal, i check the MD5 hash after weird connexion

He maybe can't have better result so try to scam people using this method.

TR/Dropper.Gen5 Check the file on AVCHECKS

Code TrDropper, [22/02/2024 23:35]
im using

TR/Dropper.Gen5 - February 23, 2024, 1:14 am

You are crazy, you think im scanning the crypted file in virustotal? wtf? also, as i said about the runtime results, i didnt set delay for bypassing the rest Av's(not all) but most important,

So i dont have what to say about you, this refund is completely wrong, as you blame me for scanning the crypted file in virustotal.

I'm using scanner.to , you just scan the file on avcheck or directly on virustotal (because you can't

have better results ?)

*directly or indirectly, the error come from you

Now look, my contrat have clear terms

You failed to delivery it in few hours, and you failed with the fud output too.

Then, to top it all off, you scan the file on VirusTotal to avoid issuing refund or providing proper service. :clap: really smart move.

aside from that, not that I want it to sound like an apology, but I guarantee bypass Windows Defender in the contract

also i was going to deliver you a second encrypted file for free with delay but since you are stupid and quick to blame me for scanning the encrypted file in virus total, you got nothing

you won't get anything from me, no matter the runtime results are bad, it does bypass windows defender, which is my main goal and it is written in the contract, so stop making pointless comments, BECAUSE I GUARANTEE ONLY BYPASSING WINDOWS DEFENDER, AND NO MATTER YOUR RUNTIME SCAN RESULTS ARE BAD

Virus total doesn't fail on a first scan. I know why you might be upset that it would cause it to fail in the future. But if it's failing on there for the first time it means it's never fud. Op can't break on the first scan because they can't fail if they've never been scanned before. So if they show up as a fail on virus total. It's because your stuff is not fud?
