Snocriz - February 22, 2024, 12:56 pm

Greetings,

My name is Snocriz. I'm 34 years old and live in New York. I usually work 2 full time jobs so I won't be on here much. I will most likely spend most of my time in the sellers section once I get the appropriate permissions, and the gaming sections. I used to dabble in some exploiting back in the early 2000s, but I cannot share this type of knowledge in this forum sadly because of the rules you guys have here. But, if you would like to learn some stuff, you can always message me on your own discord channel.

Was able to observe the rules, so no need to educate me on it. Standardize greetings would suffice.

Hack Forum Rules

1. Do not harass or threaten other members.
2. No Infecting members with malware, backdoors, or viruses
3. No direct links to infected downloads in posts or profiles.
4. No posting of personal information that isn't yours. Privacy is to be respected here. This includes any passwords, logins or dumps.
5. No adult images or links to adult websites.
6. One active HF account is allowed meaning multiple accounts will not be allowed unless you are either reporting your original account as hacked or your original account was closed for inactivity. Ban evading will result in the permanent closing of your old account and new accounts. No exceptions.
7. Advertising of competing sites is not allowed. This refers to any website with a hacker forum that's similar to HF or has a relatively similar forum structure. Advertising includes signatures, PMs, profiles, and posts.
8. No posting of fake programs.
9. No threads or posts for donation begging. This includes loan requests or asking for investors.
10. Read the violations for profile policies and rules in that help doc.
11. Any rules posted in the forum's header should also be reviewed. Some forums have special policies that must be adhered to. Don't post in any forum without reading them first.
12. Any marketplace-type threads must be in the Marketplace category under the Market tab with the exception of Marketplace Discussions forum and its subforums (not intended for marketplace style threads).
13. No advertising or posting of Discord channels unless you are in Vendor group.
14. All Marketplace rules and policies must be followed.
15. These Disallowed Blackhat Activity are restricted.
16. Off-Site Communication contact methods not allowed to be posted by non-upgraded members. This includes the posting of your email, Discord, or Telegram account names.

Posting Etiquette of Hack Forums

1. Post in the correct category.
2. Use good grammar. Basically, start sentences with a capital and end it with punctuation.
3. Don't double post. That's when you post one after another instead of editing your existing first post.

4. Don't cross post. That's when you repeat a post in multiple threads or categories. Also, it applies if you post a thread with the same or similar content multiple times across forums or in a single forum.
5. Don't post leaked content. Leaking is when information is taken from one place and posted somewhere else without giving any credit.
6. Create relevant subjects for threads. Shit like "OMG" for a subject is immature and asinine.
7. When posting content from another site, credit the site; use quotes and link to the original content (unless it is a competing forum, in which case you shouldn't be posting the content).
8. Be kind to others. How hard is it not to be an asshole?
9. Act like you're older than 16 even if you aren't.

I look forward to learning from some of you. Technology and Coding is always evolving, so there is probably some brand new content out there that is amazing!
