AI GENERATED AVATARS

For You

I will generate you a full avatar set of images using either Bing Image Creator or GPT-4 + DALLE3 + Midjourney. I cannot guarantee exact results, but I will re-prompt the engine as-needed for best results.

To qualify:

Reply letting me know what you want the theme of your avatar set to be!

It's good to think outside of the box and not be overly specific!

Re-prompt / Re-request Rule:

Only 1 initial request per user

If you really, really don't like the set I give you then if you're nice I'll redo it :)

Sorry, I need to make sure I have time for everyone

Here are some examples. Using my plugin on GPT or using Bing always results in 3-4 high quality avatars per prompt. You can expect to receive a set as well!

Spoiler [\(Click to View\)](#)

Full version examples:

Sure thing! I'm out of bing credits so it'll take a few to load up , but will do it so it's close to the other style but in red/black.

Loading up on more bing credits soon though but temporarily will have to wait per request a bit longer.

For others in thread, sorry guys but will have to add a rule to this.

If you are display group as Fallen or LSZ I can do a re-prompt but if not I have to limit it to 1

prompt/request per person.

for future users - things like this can be hard to replicate and will rarely match an exact style. Also, transparent backgrounds are tough - but you can color-select the black and remove it to re-save as PNG.

Can you please choose 1 direction to go in because unfortunately you are hitting censor triggers on the ak, the copyright for Jeezy, the blunt, and then adding in the specific details makes this hard. I can do a bald black man with a thin chin strap beard smoking a cuban cigar blunt style w/ a frosty the snowman chain I'm sure - Or can probably get an AK if I play around with it, but not sure if it'll be identical to Jeezy. specific celebrities make it difficult

Can you give me more context? should it be a guy or a girl holding a gun? A pheonix with a gun? or how should this go

A girl, and with anonymous face or so, just give it a go I give you hands free.

Here you go! Not sure what you meant by 'anonymous' if maybe you meant V for Vendetta mask, but I went for a generic, "anonymous" girl face. Have a good day!

Let me know if I should redo this - it irks me that the controller is the wrong way up because it's being shown "to the camera" rather than being used by the panda.

For You

I will generate you a full avatar set of images using either Bing Image Creator or GPT-4 + DALLE3 + Midjourney. I cannot guarantee exact results, but I will re-prompt the engine as-needed for best results.

To qualify:

Reply letting me know what you want the theme of your avatar set to be!

It's good to think outside of the box and not be overly specific!

Re-prompt / Re-request Rule:

Only 1 initial request per user

I will re-prompt / take a 2nd request if your display group is LSZ or Fallen

If you really, really don't like the set I give you then please send me a message and I may make an exception :)

Sorry, I need to make sure I have time for everyone

Here are some examples. Using my plugin on GPT or using Bing always results in 3-4 high quality avatars per prompt. You can expect to receive a set as well!

Spoiler ([Click to View](#))

Full version examples:

Hey, if you are still taking requests for this thread, then I would like to make a request, uh, something like "cute purple-haired anime girl with a laptop" or something around that general idea

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
