Thread: [Bypassing metal detector possible?](#)

Wosch - February 28, 2024, 9:17 pm

Hello guys,

So I was wondering if it is possible at all to avoid detection of your mobile device using a metal detector (attention: I dont speak about X-Ray or some other types of detection systems)

So I guess there are some ways of doing it of course physically.

Any opinions or experiences?

Thank you

Komodo - February 28, 2024, 10:30 pm

Depends on a ton of factors.

Are we visiting Magneto?

Actually I dont think I understood you properly.

Well, I will elaborate on my question:

Im talking about at least hand metal detectors produced by e.g. SmartScan or Garrett.

I guess the ones you must go through are much more difficult to bypass.
