I GOT BORED PLAYING ROBLOX FOR GODS SAKE

Oldschool Runescape perhaps?

One of the greatest mmo's in my opinion.

If that's something you'd be interested in I could help you start out even!

If you like socializing, could try out VRChat. Pretty much to experience, talk and play mini-games with random people or friends.

PlayStation Home is back online through a team called Destination Home. If you want their Discord link, feel free to DM me.

Minecraft I believe has a F2P version. Tower of Fantasy. DC Universe Online. Fall Guys.

There's a lot of F2P games that are pretty good. League of Legends, Valorant, TFT, Fortnite..etc. All very good games to play

Fortnite Zero Build is the best-ever entirely F2P game that exists today. They not only have the actual game mode itself, but also the new Rocket Racing, Lego Fortnite, and Fortnite Festival game modes, which are all free to play. The only thing you have to buy are outfits and different cars, but you can play the game with no disadvantage at all without spending any money to buy the v-bucks.

Go for OSRS, you'll have lots of fun, if you prefer better graphics try Silkroad Online

OSRS is great, but F2P on it is pretty miserable. I guess if you've NEVER played before and so don't know what all you're missing and can't compare it to having members than at first it might not seem too rough. Even then I feel like if you play a good amount than you'd quickly pick up on how much you're missing out on without members. If you liked it enough though than I suppose you'd just buy members and at that point you're probably about to get incredibly sucked into the game lol.

VRChat is filled with a lot of weirdos, creeps, degenerates, and no-lives. I mean there are SOME cool people on there, but they are pretty hard to find.

But you aren't wrong it's good for socializing, playing minigames and making new friends.

Can't personally say it's clearly more so of that on vrchat versus anything else on the internet, but it basically just sounds like pretty much any other online game. Some weirdos, some fucked up people, some cool people, etc.

That's just the harsh reality of life, my man. Soon the metaverse will play a much more prominent role in our life, and we'll see much of what you described in VR chat. Best thing you can do is not to give out your personal information. You'll be safe. Maybe even use a VPN.

It is still very healthy. There are some bot accounts inflating the number most likely but it is still very populated
