Thread: [Alt/meme coin season?](#)

Kelbo - March 3, 2024, 7:01 pm

I have been on x alot lately and all i see is every single person talking about their shitcoin gains and bags,

With the price of BTC becoming more mainstream and media covered made all the degens come out and start pumping these alt coins.

Bonk is up 218%, pepe is up 638% and MOG is up 1406% all in 1 month. I think this cycle will be meme coins to the moon along side 100k-200k btc!

I personally threw some change in all three above.

HODL long brothers, We shall see Satoshi in our penthouses on our private islands.

What all altcoins/shitcoins are you holding right now?

SUI-3183372 - March 3, 2024, 7:54 pm

I hold small amounts of BONK and WIF.

On Sui I hold a considerable amount of FUD, if that ever takes off in a similar manner to Solana's BONK, I should be able to retire and buy a small country. [not counting on it]

Hopefully Sui could do better in this bull run but is stalling, I have around 64 Sui sitting somewhere as well.

I'm holding some bonk, wen and jup on Solana. Outside of that it's hard for me to put money into meme coins but I wanted to see what would happen because I feel the Solana ecosystem is exploding. So far so good as everything is up.

saw a post on X of someone selling their WIF for 800\$ profit and now its worth 6mill. FUD to moon this memeseason!

Solana itself and its meme/alt coins on the network are outperforming most of the market rn.

I'm not counting on any meteoric rise in the short term for Sui, despite the positive price action we're seeing from other coins right now. We saw a 4x increase between October and January, I imagine that we'll settle around \$1.40-\$1.50 for a bit before we see additional positive price action.

FUD just did +100% over the last 7 days so I'd definitely look for a decent entry point.

Aptos didn't allow me into Movecon last year in Paris due to my affiliation with Sui, even though Sui is a Move based chain too. I uninstalled my Aptos wallet and stopped paying attention to their petty asses ever since. Sui is a better chain with better DeFi returns anyways.

Tag and comment us if you find some good narrative so we all could ride the wave together xD

SIM-1866423 - March 5, 2024, 10:34 pm

Suggest you all kucoin altcoins with 1-10m\$ cap, this is how people selling x100 coins you wont see any of them on binance,coinbase etc. if you want to risk everything directly buy on uniswap or pancakeswap for x1000 or more.

right now shit coins like jeo buden and olen mosk are popping off

Money4life - March 6, 2024, 6:32 pm

Why don't you guys make a shitcoin yourselves. People will eat it up in no time.
We should make a small group with people here and launch one, not a bad idea.

Not sure how big a liquidity pool has to be to start a shitcoin but I'm pretty sure some HF usergroups have done this in the past.

call hit hookforums and put it on solana, to launch a like few hundred mill coin is like 300\$ i think

spongebob - March 7, 2024, 2:51 pm

There are many costs guys to launch a coin. Raydium 3 sol fee. Dextools listing \$1000, dexscreener \$300. I do not know for birdeye. Then you have to create fake volume to get listed on coingecko and cmc. I wish I had the capital guys. If I had the money to do it I would never sell a token of my coin.

Only put a %2 tax on buy/sell and become rich with this. Then you create ads with coinzilla and boom...

Forgot to mention that if you for example want to start with 10k liquidity you need 5k worth of sol and rest 5k are tokens of your meme coin.

Eran - March 7, 2024, 3:11 pm

Hear a lot of you mention bonk. I'll look into it!

Sounds like a nice idea, let's create a group and set something up. I am a web 3 developer also i can invest a little. I am only worried about the marketing part tbh

Guys is it true if you swap between cryptocurrencies you make a hefty amount of money? \$1000btc to Shiba & then to XRP

It truly all depends on your trading style, what you like and what conditions the market is in, Alot of people lose hefty amounts as well trading. It is true you can make alot of money but alot of it is luck as well. Unless you're trading stable coins. Ive been on XRP for literal years below cents. XRP hasn't done too much over the last little, Shiba's had some good runs with the market same with BONK. But it's truly all up to the way you trade. Just don't overleverage and lose it all! GL poster!
