Thread: [Selling Wordpress Oday](#)

ScrubspooF - March 4, 2024, 4:46 pm

Autoshell (c99 or any php file) with this wordpress plugin Oday. This php script will upload a file to about 110k affected websites and output a list of the urls.

Open to offers, looking for 10k.. which is a great deal considering one shell goes for \$1-5.

Not going first under any circumstances, crypto only.

You found this exploit or this is public exploit but you modified and tweaked it?

I found an upload vulnerability in a particular wordpress plugin that 110k sites use. No one else has this.

I can't afford to splurge on information like this and don't have a personal use for it, but this is very interesting. Is this something where the 110k amount could potentially increase over time?

an4l 1st - March 9, 2024, 12:21 pm

would you possibly have a list of theses sites organized per country?

I know I am pushing it a little but who knows, maybe you are one of those hyper organized people who we love so much

Well worth the money

But...what guaranty do you give that this 0day exploit won't be patched tomorrow

I've had this for a while and it has persisted through plugin updates. They have no idea and unless you do something incredibly stupid with every shell nobody will ever even figure out what plugin it is.

You could autoroot these and sell rooted servers for \$30 each, WELL worth 10k.

You could also iframe every blog and sell traffic.
