I am split up between PEPE, SHIB, DYDX, and WIF.

What are you invested in?

**Comrade** - March 7, 2024, 9:18 pm

ETH !!!

I always trusted the purple master.....

when it was low in 2023, i held it/bought some & in 2024, got rewarded!!! :D

Everyone holds the major stables, btc, ltc, eth but I mean non stable ?

**Rahul007rhp** - March 7, 2024, 9:19 pm

Im mostly in good fundamental tokens matic , link , atom & ftm

Hoping them to pop off real soon

What you'll notice is if BTC is doing good, the rest of the coins are. If btc is doing bad, likely the alts are also doing bad. It's a dominos effect.

Not ALWAYS, but a lot of times from what I can see.

I am holding \$0 crypto. Gave it all to [Beherit](#) kappa

**Bastille** - March 7, 2024, 11:57 pm

I mainly bought ETH, tried few different things such as ADA, ETC, LTC, also tried MANA but it didn't go well, the metaverse was a hype, let's see how it goes in the future, as Apple entered the market with the Apple Vision Pro we could expect a better health for the metaverse field for 2028-2030

I don't really invest in altcoins or memecoins, but I was like \$800+ invested in btc right before it

exploded recently.

anyone have some crypro knowledge should be rich

**Euaggelistes** - March 12, 2024, 4:27 pm

Mainly on the Secret network.

Have a bit in bnb, a little ETH and LTC sprinkled here and there.

**Domestos** - March 12, 2024, 4:29 pm

Most of my invesments are in BTC, though I have some ETH and DOGE, I am starting to think doge was a mistake, no idea if I should pull out lol

**Yin Yang** - March 12, 2024, 5:37 pm

Btc, ETH, sui, sand, and A0.

I also have a minor allocation (1% each) in Fideum (FI), brillion (Dua), and carbon browser (CSIX).

**Kalvaxas** - March 12, 2024, 5:48 pm

I don't hold coins very long. Stable pays off in terms of safety, but I enjoy day trading or what's known as scalping. Right now, I'm holding onto NEAR Protocol. I had AMP yesterday and was rewarded. About a 145% increase in two days just from those two coins alone. Which is about what you get in 1 years time if you invest in BTC/ETH only.

**Swip3r** - March 12, 2024, 6:44 pm

I don't personally hold any memecoins but I'd definitely take profit eventually, we've seen how every cycle ends with the memecoins lol

Glad some people are making money though, unfortunately a lot won't realize their PnL

I also have a minor allocation (1% each) in Fideum (FI), brillion (Dua), and carbon browser (CSIX). You have to remember alot of these coins the legit ones and not the shitones are raising capital to eventually make their coin a usable utility or practical software/platform, but when everyone is looking at it as a quick flip it makes it extremely difficult for the development teams to focus on turing their products into usable utilities. Just something to think about!

**Dirty** - March 13, 2024, 3:55 am

BTC,ETH,ADA,LINK,XMR and then some LTC for actually using it.

**Eran** - March 13, 2024, 12:24 pm

Heard a lot of hype behind BONK.

**Chapman** - April 27, 2024, 9:13 am

My funds are stuck at future trading, i am into some swing trades.
